

Mobile App User Manual

Digitex School Management System

Version: Laravel 11 | **Document date:** June 11, 2026

E-Digitex SMS — Multi-Institution Education Platform

Confidential — For authorized users only

Digitex Portal — Mobile App User Manual

Complete Guide for All Users

App name: Digitex Portal (Digitex Management)

Audience: Gate attendants, teachers, school administrators, accountants, students, parents/guardians, and platform super administrators.

Goal: Explain every screen, button, and daily workflow in plain language — with realistic example names, numbers, and messages — so any user can operate the app confidently without technical training.

Related documentation:

Document	What it covers
user-manual.md	Web admin panel (browser) at https://e-digitex.com/
api-manual.md	Hardware scanners and API integration
developer-manual.md	Technical reference for IT staff

How to Read This Manual

Each chapter is organized by **user role** and **task**. Every section includes:

- **Purpose** — Why this feature exists
- **Who uses it** — Which accounts see it
- **Step-by-step** — Exact taps and expected results
- **Example story** — A realistic school-day scenario with sample values
- **Common questions** — Troubleshooting in everyday language

Icons and colours in the app follow the Digitex brand: dark blue headers, coloured module cards, green for success, red for errors.

Example School Used Throughout

To keep examples consistent, this manual uses one fictional institution:

Item	Example value
School name	Green Valley International School
Short code	GVIS
Academic session	2025–2026
Sample class	Grade 5 Section A
Sample student	Marie Kouassi — Admission No. GVIS-2025-0142 , NFC Card ID A1B2C3D4
Sample parent	Mrs. Aya Kouassi — Phone +225 07 12 34 56 78
Sample teacher	Mr. Jean Dupont — Staff ID EMP-1042 , Email j.dupont@gvis.edu.ci
Sample gate attendant	Mr. Koffi Mensah — Staff ID EMP-0091
Sample school admin	Mrs. Fatou Diallo — Email admin@gvis.edu.ci
Sample accountant	Mr. Ibrahim Traoré — Email accounts@gvis.edu.ci
Sample super admin	Digitex platform operator — Email superadmin@digitex.com
API server	https://account.digitexvx.com/api/v1

Your real login details are issued by your school administrator. The values above are **illustrations only**.

PART 1 — INSTALLING AND OPENING THE APP

Purpose

The Digitex Portal mobile app connects staff and families to live school data: gate attendance, pickup approval, fees, results, homework, and announcements. It is the **field companion** to the web admin at <https://e-digitex.com/>.

Who uses it

Everyone with a school account: gate attendants, teachers, admin staff, accountants, students, guardians, and super administrators.

System requirements

Requirement	Details
Android	Android 8.0 or newer recommended
NFC	Required for card scanning modules (most mid-range phones support NFC)
Camera	Required for QR pickup scanning
Internet	Wi-Fi or mobile data — the app does not work fully offline
Permissions	Camera (QR), NFC (when prompted), notifications (optional, for pickup alerts)

Step-by-step — First launch

- Install **Digitex Portal** from the APK or app store link provided by your school IT team.
- Open the app. You see the **Digitex logo**, app title "**Digitex Portal**", and subtitle *"Sign in to access school hardware modules"*.
- Top-right: language toggle shows **EN** or **FR** — tap to switch between English and French.
- If you were logged in before, the app may **auto-login** using a saved token and skip directly to your dashboard or gate terminal.

Example story

Mr. Koffi receives a new Android phone on Monday. IT installs Digitex Portal, enables NFC in phone settings, and gives him Staff ID EMP-0091 with a temporary password. He opens the app, switches language to French, signs in, and lands on the **Gate Terminal** screen because his account has gate-mode enabled.

Common questions

Q: Do students and parents use the same app?

A: Yes. One app, one login screen. After login, the server decides which modules you see based on your role.

Q: Can I use the app on a tablet?

A: Yes, if it runs Android and has NFC (for scanning modules).

PART 2 — LOGGING IN (ALL USERS)

Purpose

Authentication connects your device to your school account on the Digitex server. All modules load only after a successful login.

Login screen elements

Element	Description
Language button	Toggles EN ↔ FR for all labels
Logo	Digitex branding
Email, Username or Staff ID	Single field — see formats below
Password	Hidden by default; eye icon toggles visibility
Sign In	Submits credentials; shows spinner while connecting

Accepted login identifiers

The username field accepts **any one** of these (sent to the server as your login ID):

User type	Example login value	Notes
School admin	admin@gvis.edu.ci	Email address
Teacher	j.dupont@gvis.edu.ci	Email
Teacher / staff	EMP-1042	Employee / Staff ID
Gate attendant	EMP-0091	Staff ID
Accountant	accounts@gvis.edu.ci	Email
Student	GVIS-2025-0142	Admission number or shortcode
Guardian / parent	aya.kouassi@gmail.com	Email or phone-linked account

Super admin	superadmin@digitex.com	Platform email
-------------	------------------------	----------------

Password: Provided by your administrator at account creation. Example temporary password: `Welcome@2025` (you should change it in Profile after first login).

Step-by-step — Successful login

- Enter login ID, e.g. `EMP-1042`
 - Enter password
 - Tap **Sign In**
 - App calls the server and stores a secure token
 - App loads your context: school name, logo, role, academic session, available modules
 - Routing:
- **Gate Attendant (`gate_mode`)** → **Gate Terminal** screen (simplified grid)
 - **All other roles** → **Dashboard** with module cards

Step-by-step — Failed login

Message / behaviour	Meaning	What to do
Invalid credentials	Wrong ID or password	Re-check caps lock; ask admin to reset
Network error dialog	No internet or server unreachable	Check Wi-Fi/data; tap Retry
Blank after login	Rare token issue	Force-close app and reopen

Example stories

Teacher login:

Mr. Jean Dupont enters `j.dupont@gvis.edu.ci` and his password. Dashboard shows: `"Welcome, Jean Dupont at Green Valley International School (2025-2026)"` with role badge **Teacher** and **Staff Tools** grid.

Student login:

Marie Kouassi enters admission number `GVIS-2025-0142`. Dashboard shows **Student Portal** with eight modules including **My Gate Pass** and **My Fees**.

Gate attendant login:

Mr. Koffi enters `EMP-0091`. He never sees the full dashboard — only the **Gate Terminal** with eight large scan tiles and a **Logout** button.

Common questions

Q: I am both a teacher and a parent. Which portal do I see?

A: If your account has both staff and student/guardian access, the dashboard shows **two sections**: **Staff Tools** at the top and **Student Portal** below. Use the **Select child** dropdown when viewing student data for a linked child.

Q: Does the app remember me?

A: Yes. Closing the app usually keeps you logged in until you tap **Logout** or the server invalidates your token.

PART 3 — UNDERSTANDING YOUR DASHBOARD

Purpose

The dashboard is your **home screen** — a grid of coloured tiles (modules). Each tile opens one feature. What you see depends on your role and school configuration.

Dashboard header (standard mode)

After login, the top area shows:

Welcome, Jean Dupont

at Green Valley International School

(2025–2026)

Role: Teacher

Additional indicators may appear:

Badge	Meaning
Subject-wise attendance enabled	Your school marks attendance per subject, not only per class
Select child dropdown	Guardian viewing a specific child's data
Full access — staff & student modules	Super Admin or dual-role account

App bar buttons (standard dashboard)

Icon	Name	Action
School logo	Branding	Left side; shows your institution logo
Bell (with red number)	Live Pickups	Opens pickup options; badge = pending pickup count
Person circle	My Profile	Opens profile and password settings
Globe	Language	Switches EN ↔ FR instantly

Logout	Sign out	Clears session and returns to login
--------	----------	-------------------------------------

Staff Tools modules (capability-gated)

Module tile	Subtitle	Who typically sees it
Gate Attendance	NFC In / Out	Gate staff, admin, super admin
Kids Pickup	QR & NFC Release	Teachers, pickup managers, admin
Fee Status	Check Balances	Admin, accountant, gate staff
Fee Search	Lookup by name	Admin, accountant (not in gate mode)
Report Cards	Parent Signature	Admin, teachers with hardware access
Student Identity	Verify student card & photo	Gate staff, admin
Take Attendance	Class / subject manual	Teachers
Class Absentees	Today's absent list	Teachers, admin staff
Today's Timetable	Your schedule	Teachers, staff
Today's Scans	Live roster	Gate staff, teachers, admin
Notices	Announcements	All staff

Super Admin sees **all** staff modules regardless of individual flags.

Student Portal modules (eight tiles)

Module	Subtitle	Opens
My Gate Pass	Generate QR Code	Pickup QR for parents/guardians
My Attendance	View History	Last 30 attendance records
My Fees	View Invoices	Balance and invoice list
My Results	View Report Cards	Exam marks (blocked if fees owed)
My Homework	View Assignments	Assignments with deadlines

My Requests	Submit Leave/Request	Absence and leave tickets
Today's Timetable	Your schedule	Class periods for today
Notices	Announcements	School notices

Recent Gate Scans strip

Staff users with hardware access may see the **last three gate scans** on the dashboard, e.g.:

Student	Time In	Status
Marie Kouassi	07:42	Present
Yao Christian	07:55	Late
Aminata Diallo	08:01	Present

Tap **Today's Scans** for the full live list.

Example story

Monday 07:30 — Mr. Dupont opens the app. Bell icon shows **2** pending pickups from yesterday evening. He taps the bell, selects **Live Pickups**, and releases two students whose parents waited at the gate. He then opens **Take Attendance** for Grade 5 Section A before first period.

Common questions

Q: I don't see "Take Attendance".

A: Your account may lack the `mark_attendance` permission, or you are in Gate Terminal mode (gate attendants don't mark class attendance in the app).

Q: Why are there two sections on my dashboard?

A: You have both staff and student/guardian access — e.g. a teacher who is also a parent.

PART 4 — GATE ATTENDANT — GATE TERMINAL MODE

Purpose

Gate Terminal is a **simplified, full-screen layout** for security staff at the school entrance. It removes profile, language, and student portal clutter so attendants can scan cards quickly.

Who uses it

Users with **Gate Attendant** role or `gate_mode` capability from the server. After login they **never** see the standard dashboard.

Gate Terminal layout

App bar: School logo (left) · **Logout** (right only)

Welcome text (example):

Welcome, Koffi Mensah at Green Valley International School (2025–2026)
Scan staff or student cards for attendance. Parents scan QR for pickup.

Eight module tiles (2×4 grid):

#	Tile	Action
1	Gate Attendance	NFC student/staff in-out
2	Staff Check-in	NFC staff attendance
3	Kids Pickup	NFC pickup release
4	Fee Status	NFC fee balance check
5	Report Cards	NFC report card lookup
6	Student Identity	NFC photo & ID verification
7	Live Pickups	Pending parent pickup list

8	Today's Scans	Full attendance log for today
---	---------------	-------------------------------

Step-by-step — Morning student arrival

- Mr. Koffi opens app → Gate Terminal appears automatically
 - Taps **Gate Attendance**
 - Screen shows: *"Ready. Tap an NFC/RFID card to the back of your phone."*
 - Student Marie Kouassi taps card `A1B2C3D4` on phone
 - Success sound plays; modal shows:
- **Success!**
 - Student: Marie Kouassi
 - Class: Grade 5 Section A
 - Time In: 07:42
 - Status: Present
- Taps **Continue Scanning** for next student

Step-by-step — Manual ID entry (card not working)

- On NFC screen, scroll to **Or enter ID manually**
- Type admission number: `GVIS-2025-0142`
- Tap **Submit Manual ID**
- Same result modal as NFC scan

Example story — Busy Friday dismissal

14:30 — Queue at gate. Mr. Koffi alternates between **Kids Pickup** (NFC taps) and **Live Pickups** (teacher approvals). By 15:00, **Today's Scans** shows 412 time-outs recorded. One parent forgot QR; teacher uses **Manual OTP** from the staff dashboard (see Part 6).

Common questions

Q: Can gate attendants change language?

A: Gate Terminal does not show the language button. Set language before login on the login screen, or ask IT to add standard dashboard access if needed.

Q: NFC says "not supported or disabled".

A: Enable NFC in Android Settings → Connected devices → NFC.

PART 5 — NFC SCANNING WORKFLOWS

(SHARED)

Purpose

The **Universal NFC Screen** handles all card-based operations. The same scanning UI is reused for attendance, fees, pickup, report cards, and identity checks — only the backend **purpose** changes.

How to open

From Dashboard or Gate Terminal, tap the relevant module tile (e.g. **Gate Attendance, Fee Status**).

Screen elements

Element	Description
Large NFC icon	Visual cue for tap position
Status line	"Ready. Tap an NFC/RFID card..." or "Processing"
Manual ID field	Fallback text entry
Submit Manual ID	Sends typed ID to server
Recent scans list	Shown for attendance purpose only (last entries)

Scan purposes explained

1. Gate Attendance (attendance)

Use: Record student or staff **time in** and **time out** at the gate.

Example success result:

Field	Example value
-------	---------------

Student	Marie Kouassi
Type	student
Time In	07:42
Time Out	— (blank until exit scan)
Status	Present
Punctuality	On time

Second scan same day: Records **Time Out**, e.g. 15:05.

Staff scan: Same screen; result shows employee name and designation instead of class.

2. Fee Status (`fee_check`)

Use: Instantly check whether a student has outstanding fees — useful at gate or office.

Example result:

Field	Example value
Student	Marie Kouassi
Total Balance	XOF 450,000
Paid	XOF 300,000
Remaining	XOF 150,000
Last Payment	12/09/2025

3. Kids Pickup — NFC (`pickup`)

Use: Release a student to an authorized collector when they tap the student's NFC card at pickup time.

Example flow:

- Parent arrives; student card tapped
- Modal: `"Scan successful! Please wait for teacher approval."`

- Teacher sees request in **Live Pickups**
 - Teacher taps **RELEASE STUDENT**
 - Parent receives SMS/WhatsApp: pickup approved
-

4. Report Cards (`report_card`)

Use: Look up published exam results via card — often used when parents collect signed report cards at the office.

Example result:

Field	Example value
Exam	Term 1 Examination 2025
Student	Marie Kouassi
Mathematics	16 / 20
French	14 / 20
Science	18 / 20
Total	148 / 200

5. Student Identity (`identity_check`)

Use: Verify the person holding a card matches the student record — shows photo and biodata.

Example modal fields:

Field	Example value
Photo	Student portrait
Full name	Marie Kouassi
Admission No.	GVIS-2025-0142
Class	Grade 5 Section A

Roll No.	14
Date of birth	15/03/2014
Blood group	O+
Father	Mr. Kouassi — +225 07 12 34 56 78
Address	Cocody, Abidjan

Sounds and feedback

Event	Feedback
Successful scan	Success tone
Failed scan	Error tone
Modal	Green header = success; red = failure

Tap **Continue Scanning** to reset for the next person.

Example story

Accountant Mrs. Traoré uses **Fee Status** at the bursar window. Three parents in queue tap cards. Two show **Remaining: XOF 0** — cleared for exam registration. One shows **Remaining: XOF 75,000** — directed to payment desk.

PART 6 — KIDS PICKUP — COMPLETE FLOW

Purpose

Secure child collection: only authorized adults collect students. Combines **QR codes**, **NFC cards**, **teacher approval**, and **OTP fallback**.

Roles in pickup

Role	Responsibility
Student / Guardian	Generate gate-pass QR in app
Gate attendant	Scan QR or NFC at gate
Teacher / Admin	Approve release in Live Pickups
System	Sends status SMS/WhatsApp when configured

Method A — QR code pickup (most common)

Parent / student side

- Open app → **My Gate Pass** (Student Portal)
- Tap to generate QR (calls server)
- Screen shows:
 - QR image
 - **Expires at:** e.g. 10/06/2026 15:30
 - Instruction: *"Present this QR code to the gate guard."*
- Parent shows QR on phone at gate

Gate side

- Staff opens **Kids Pickup** from dashboard bell menu → **Scan QR**
- Camera opens with viewfinder

- Scan parent's QR
- Processing overlay: `*"Validating Gate Pass..."*`
- On success: pickup request created — status **Scanned**, waiting teacher

Teacher approval

- Open **Live Pickups** (from dashboard bell or tile)
- See card example:

```
Marie Kouassi
Class: Grade 5 Section A
Parent Contact: +225 07 12 34 56 78
Requested By: Parent
Status: Scanned
[ RELEASE STUDENT ]
```

- Tap **RELEASE STUDENT**
- Snackbar: `*"Student Released Successfully!"*`
- Parent may receive: `*"Marie Kouassi released safely at 14:50"*`

Method B — NFC pickup

- Gate staff opens **Kids Pickup** → NFC mode (or Gate Terminal **Kids Pickup** tile)
- Student taps NFC card
- Same teacher approval flow as QR

Method C — Manual OTP (lost phone / no QR)

Available from staff dashboard **Kids Pickup** menu:

- Select **Manual OTP Release**
- Enter admission number: `GVIS-2025-0142`
- Tap **Send OTP to Parent**
- Parent receives 6-digit SMS, e.g. `847293`
- Staff enters OTP in app
- Tap **Verify OTP**

- Pickup request created; teacher still approves in **Live Pickups** if policy requires

Live Pickups screen details

Feature	Behaviour
Auto-refresh	Every 15 seconds
Refresh button	Manual reload top-right
Grouping	By date — Today vs Past pending
Empty state	*"All Clear! No parents are currently waiting at the gate."*
New arrival alert	Sound + snackbar when count increases

Dashboard bell menu (pickup)

Teachers and pickup managers see:

Option	Action
Scan QR	Opens camera scanner
Live Pickups	Opens approval list
Manual OTP	Opens OTP dialog

Badge number = count of pending/scanned pickups awaiting action.

Example story — Full afternoon cycle

Time	Event
14:35	Mrs. Kouassi generates QR for Marie
14:44	Guard scans QR — status Scanned
14:44	Mr. Dupont's phone plays alert — bell shows 1
14:46	Mr. Dupont taps RELEASE STUDENT
14:46	Marie exits gate; scan logged in Today's Scans time-out

Common questions

Q: QR expired.

A: Regenerate **My Gate Pass** — QRs have a short expiry for security.

Q: Teacher doesn't see pickup.

A: Confirm teacher has pickup permission; check internet; pull refresh on Live Pickups.

Q: OTP invalid.

A: OTP expires quickly; request a new code. Verify correct admission number.

PART 7 — TEACHER — MANUAL ATTENDANCE

Purpose

Teachers record **Present**, **Absent**, **Late**, **Excused**, or **Half Day** for each student in assigned classes — either once per day (class-wise) or per subject (subject-wise).

Who uses it

Teachers and staff with `mark_attendance` capability.

Step-by-step — Class-wise attendance

- Dashboard → **Take Attendance**
- **Select Class** dropdown → choose `Grade 5 Section A`
- Roster loads, e.g. 32 students
- For each student, set status:

Student	Default	Teacher sets
Marie Kouassi	Present	Present
Yao Christian	Present	Late
Aminata Diallo	Present	Absent

- Tap **Save Attendance**
- Confirmation message; data sent to server

Step-by-step — Subject-wise attendance

When school enables subject-wise mode (badge on dashboard):

- Select class: `Licence 1 (BCOM) - Section A`
- **Select Subject** dropdown → e.g. `Accounting 101`
- Mark roster for that subject period only

- **Save Attendance**

Attendance status meanings

Status	When to use
Present	Student in class
Absent	Student not in class — triggers absentee lists
Late	Arrived after late margin (school configuration)
Excused	Approved absence
Half Day	Left early or arrived mid-day

Locked attendance

If the school locked past days, you see:

"Attendance marking is locked."

Save is disabled. Contact School Admin to adjust lock settings on the web admin.

Example story

08:15 — Mr. Dupont marks Grade 5 Section A. Two absent: Marie Kouassi and Yao Christian (sick). At 09:00 he opens **Class Absentees** and sends SMS to both parents.

Common questions

Q: No classes in dropdown.

A: *"No active classes assigned to you."* — Admin must assign homeroom, timetable, or class subjects on web admin.

Q: Subject dropdown empty.

A: *"No subjects assigned for this class."* — Check class subject allocation.

PART 8 — TEACHER — CLASS ABSENTEES & PARENT ALERTS

Purpose

View who was absent today (or recent days), contact parents by phone/WhatsApp, and send **SMS and/or WhatsApp absence alerts** directly from the app.

Who uses it

Teachers, school admin staff, and super admin.

Opening the screen

Dashboard → **Class Absentees**

Screen layout

Summary header (example)

Today (10 Jun)		
Section: Licence 1 (BCOM) - Section A		
2	0	2
Total	Present	Absent

Absent student card (example)

☐ Madisyn Lebsack (32682588)
☐ Caleb Schroeder (parent)
☐ +243 991 214 567 [Call] [WhatsApp]
 [Send SMS] [Send WhatsApp] [SMS + WhatsApp]

Step-by-step — Notify one parent

- Find student in absent list
- Tap **Send SMS** (or WhatsApp / both)
- Confirm dialog: `*"Send absence notification to parent of Madisyn Lebsack?"*`
- Choose channels if prompted: ☒ SMS ☒ WhatsApp
- Tap **Send Notification**
- Result snackbar, e.g.: `*"Notifications sent for 1 student(s). (Sent: 1, Failed: 0)"*`

Sample SMS received by parent:

> Dear Parent, your child Madisyn Lebsack was marked absent from Green Valley International School on 10/06/2026. Please contact the school if you have any questions.

Step-by-step — Bulk notify

- Tap **Select all absent students** (or tick individual checkboxes)
- Bottom bar: **Notify Selected (2)**
- Choose SMS / WhatsApp / both
- Confirm and send

Contact actions

Button	Action
Green phone icon	Opens device dialer with parent number
WhatsApp icon	Opens WhatsApp chat with parent
Phone row tap	Bottom sheet with full number and actions

Toolbar actions

Button	Action
Refresh	Reload absentee data from server
Select All	Tick all absent students in section

Clear selection	Untick all
-----------------	------------

When notifications fail

The app shows the **specific server reason**, for example:

Message	Cause	Fix
Template 'student_absent' missing	SMS template not configured	School admin: Configuration → SMS Templates
No parent phone number on file	Parent record incomplete	Update parent phone on web admin
Insufficient credits	SMS balance empty	Super admin: recharge credits
sms: Provider error	Gateway misconfigured	Check SMS provider in Configuration

Example story

Mr. Dupont selects two absent students, sends **SMS + WhatsApp** to both parents before 09:30. One succeeds; one fails with **"No parent phone number on file"** — he calls the office to update the parent record for Yao Christian.

Common questions

Q: Student not listed but was absent.

A: Attendance may not be saved yet, or student is in a section you don't access.

Q: Can I notify for yesterday?

A: The report groups by date; select students from the relevant date section.

PART 9 — TODAY'S SCANS — LIVE ROSTER

Purpose

Real-time list of everyone who scanned at the gate today — time in, time out, photo, and status.

Who uses it

Gate attendants, teachers, school admin.

Step-by-step

- Open **Today's Scans**
- List auto-refreshes every **10 seconds**
- Tap **Refresh** for immediate reload

Example row

Photo	Marie Kouassi
Time In	07:42
Time Out	15:05
Status	Present (green badge)

Status badges

Colour	Status
Green	Present
Red	Absent (manual attendance, not gate)
Orange	Late

Example story

School Admin Mrs. Diallo checks **Today's Scans** at 10:00. She counts 398 time-ins against 420 enrolled — identifies 22 not yet arrived and calls homeroom teachers.

PART 10 — FEE STATUS & FEE SEARCH

Fee Status (NFC)

Path: Dashboard → **Fee Status** → Universal NFC Screen

Scan student card → modal shows balance summary (see Part 5).

Example — cleared student:

- Total: XOF 450,000 · Paid: XOF 450,000 · **Remaining: XOF 0**

Example — debtor:

- Remaining: **XOF 150,000** — student may be blocked from viewing results in Student Portal until paid.

Fee Search (text lookup)

Path: Dashboard → **Fee Search**

Who: Admin, accountant (not shown in Gate Terminal mode)

Step-by-step

- Type at least **2 characters** — name or admission number
- Example search: Marie or GVIS-2025
- Results list:

```
Marie Kouassi – GVIS-2025-0142
Grade 5 Section A
Outstanding: XOF 150,000 [OVERDUE]
```

- Tap a row for detail if available

Example story

Mr. Traoré (accountant) searches **Kouassi** during fee collection week. Finds two siblings, records payment on web admin, then re-scans cards at window showing **Remaining: XOF 0**

.

PART 11 — REPORT CARDS & STUDENT IDENTITY

Report Cards (NFC)

Use cases:

- Parent collects signed bulletin at office — staff verifies marks on device
- Gate event — quick academic status check

Scan card → exam breakdown with subject marks and totals (see Part 5).

Note: Students see full results in **My Results**; staff NFC view is for verification at counter/gate.

Student Identity (NFC)

Use cases:

- Verify stranger picking up child matches registered photo
- Security check at exam hall entrance

Opens dedicated dialog with photo and full biodata (see Part 5).

Example story

Unknown adult claims to be uncle at gate. Guard scans student's card in **Student Identity**, compares photo to adult — escalates to office when mismatch.

PART 12 — TIMETABLE & NOTICES

Today's Timetable

Path: Dashboard → **Today's Timetable** (Staff or Student Portal)

Example entries — Teacher (Mr. Dupont)

Time	Subject	Class	Room
08:00 - 09:00	Mathematics	Grade 5 A	Room 12
10:00 - 11:00	Mathematics	Grade 6 B	Room 14
14:00 - 15:00	Club Math	Grade 5 A	Lab 2

Example entries — Student (Marie)

Time	Subject	Teacher	Room
08:00	Mathematics	Mr. Dupont	Room 12
09:00	French	Ms. Koné	Room 12
11:00	Science	Dr. Bamba	Lab 1

Pull down to refresh.

Notices

Path: Dashboard or Student Portal → **Notices**

Example notice cards

Type	Title	Body excerpt
 Urgent	School Closed Thursday	Due to public holiday...
 Warning	Fee deadline 15 June	Last date for Term 2...

 Normal	Sports Day 20 June	All parents invited...
--	--------------------	------------------------

Pull down to refresh. Notices are filtered by audience — students see student/parent notices; staff see staff notices.

PART 13 — STUDENT PORTAL — ALL MODULES

Purpose

Students (and guardians acting for children) access personal academic and administrative information.

My Gate Pass

Generate time-limited QR for pickup. See Part 6.

Example expiry: 10/06/2026 15:30

My Attendance

Shows last **30** attendance records.

Date	Status	Time In
09/06/2026	Present	07:40
08/06/2026	Late	08:15
07/06/2026	Present	07:38

Colour coding: green = present, red = absent, orange = late.

My Fees

Summary card (example)

Field	Value
Total Fees Due	XOF 450,000
Amount Paid	XOF 300,000

Outstanding Balance	XOF 150,000
----------------------------	--------------------

Invoice list

Invoice #INV-2025-0842 Term 2 Tuition – Due: 15/06/2026 Amount: XOF 150,000 [OVERDUE]

My Results

When fees are clear

Shows **Official Transcript** with exams, subjects, marks, grades.

Example:

Term 1 Examination 2025		
Mathematics	16/20	A
French	14/20	B
Science	18/20	A*
Total	148/200	

When fees are owed — blocked

Screen shows:

- **Results Locked**
- *"Please clear your outstanding balance to view your exam results."*
- Outstanding amount displayed

School policy (configured on web admin) controls this block.

My Homework

Lists assignments (~7 days).

Example card:

Subject: Mathematics
Title: Exercise 4 – Fractions
Deadline: 12/06/2026
[Download File] (if attachment exists)

My Requests

Two tabs: **History** and **New Request**

Submit new request

- Tab **New Request**
- **Request Type:** Absence / Late Arrival / Leave / Other
- **Reason:** Free text, e.g. *"Doctor appointment 14 June"*
- Tap **Submit Request**
- Appears in **History** with status **Pending**

History example

Ticket	Type	Status
#REQ-1042	Absence	Approved
#REQ-1038	Late	Pending

Admin processes requests on web admin; student sees status update on refresh.

PART 14 — GUARDIAN / PARENT PORTAL

Purpose

Parents and guardians monitor children and participate in pickup — usually through a **Guardian account** linked to one or more students.

Login

Same app and login screen. Example: `aya.kouassi@gmail.com`

Select child dropdown

When multiple children are linked:

Select child: [Marie Kouassi ▼]
[Yao Kouassi]

All Student Portal modules apply to the **selected child**.

Typical parent workflows

Task	Module
Generate pickup QR	My Gate Pass (for selected child)
Check attendance	My Attendance
Pay fees at school / check balance	My Fees
View results	My Results
Read homework	My Homework
Report absence in advance	My Requests
Read school news	Notices

Example story

Mrs. Kouassi logs in, selects **Marie Kouassi**, checks **My Fees** — sees XOF 150,000 overdue. She pays at school. Same evening she opens **My Gate Pass** for tomorrow's pickup QR.

Common questions

Q: I see no children in dropdown.

A: Admin must link your guardian account to student records on web admin.

Q: Can both parents use one account?

A: Typically one guardian login is created; school may create separate accounts per parent if needed.

PART 15 — SCHOOL ADMIN & ACCOUNTANT ON MOBILE

Purpose

Administrators and finance staff use mobile for **field operations** — gate verification, fee checks, absentee alerts, pickup oversight — while full configuration remains on web admin.

Typical admin mobile modules

Module	Admin use case
Gate Attendance	Spot-check gate operations
Class Absentees	Send bulk absence alerts
Fee Search / Fee Status	Verify payment at counter
Student Identity	Fraud prevention at gate
Live Pickups	Approve when teachers unavailable
Today's Scans	Monitor arrival statistics
Notices	Read urgent announcements on the move

Accountant example day

Time	Action
08:00	Fee Search — verify 5 walk-in payments
10:00	Fee Status NFC — confirm clearance before exam registration
14:00	Web admin — record payments (full finance on browser)

School admin example day

Time	Action
07:45	Today's Scans — 95% arrival by first bell
09:30	Class Absentees — verify teachers sent parent alerts
15:00	Live Pickups — assist during staff shortage

Important: Creating students, configuring SMS, managing subscriptions, and full reports require the **web admin** at <https://e-digitex.com/> — see `user-manual.md`.

PART 16 — SUPER ADMIN ON MOBILE

Purpose

Digitex platform operators (Super Admin) have **full mobile access** to all staff and student modules for testing and emergency support at any school.

Behaviour

- Capability flag `super_admin: true` unlocks **every** staff module tile
- Dashboard subtitle may show: `"Full access — staff & student modules"`
- Both **Staff Tools** and **Student Portal** sections visible
- Can notify absentees, scan NFC, approve pickups at any institution context their token allows

Web vs mobile split

Task	Mobile	Web admin
Platform statistics	Limited	Full platform dashboard
Create institutions	No	Yes
SMS credit recharge	No	Yes
Module toggles	No	Yes
Gate scan testing	Yes	N/A
Support parent pickup	Yes	Yes

Example story

Digitex support engineer logs in as Super Admin, switches school context on web, then uses mobile **Gate Attendance** at Green Valley to verify NFC integration after deployment.

PART 17 — PROFILE, PASSWORD & LANGUAGE

Opening profile

Dashboard app bar → **Account circle** icon → **My Profile**

Profile fields

Field	Editable	Example
Photo	Yes (camera/gallery)	Portrait
Name	Usually read-only	Jean Dupont
Email	Read-only	j.dupont@gvis.edu.ci
Shortcode	Read-only	EMP-1042
Phone	Yes	+225 07 00 00 00 00
Address	Yes	Cocody, Abidjan
Class / Department	Read-only	Grade 5 A / Mathematics

Change password

- Scroll to password section
- Enter current password
- Enter new password twice
- Tap **Save Changes**

Language

Toggle **EN** / **FR** from dashboard app bar at any time. All module titles and messages update immediately.

Logout

Dashboard app bar → **Logout** — returns to login screen and clears saved token.

PART 18 — NOTIFICATIONS & SOUNDS

Push notifications (FCM)

On login, the app registers for push notifications if Firebase is configured. Used for platform-level alerts.

In-app pickup alerts

Trigger	Feedback
New pending pickup	Bell badge count increases
Count rises while app open	Success sound + snackbar <code>*"New pickup at gate (N pending)"</code> *

Polling interval: **10 seconds** on dashboard.

Absence alerts (SMS/WhatsApp)

Sent from **Class Absentees** — not push notifications. Delivered via school's SMS/WhatsApp gateway to parent phone numbers.

Example pickup alert sequence

- Guard scans QR — pending count 0 → 1
 - Teacher's phone plays tone
 - Snackbar: `*"New pickup at gate (1 pending)"`*
 - Bell shows red **1**
-

PART 19 — TROUBLESHOOTING

Login & connection

Problem	Solution
Network error on login	Check internet; verify server URL with IT
Invalid credentials	Reset password via web admin
App stuck on loading	Force-close and reopen; check server status

NFC scanning

Problem	Solution
NFC disabled	Android Settings → NFC → On
Card not detected	Remove phone case; tap centre-back; try manual ID
Unknown card	Student card may be unregistered — admin updates RFID on web
Wrong student returned	Verify card assignment in student record

QR pickup

Problem	Solution
Camera black	Grant camera permission in app settings
Invalid QR	Regenerate gate pass; check expiry time
Scan OK but no release	Teacher must approve in Live Pickups

Attendance & absentees

Problem	Solution
No classes assigned	Admin assigns timetable/homeroom

Attendance locked	Admin adjusts lock days in web Settings
Notify failed — template missing	Run SMS template migration/seeder on server
Notify failed — no phone	Add parent phone in web admin Parents module

Student portal

Problem	Solution
Results locked	Pay outstanding fees
No homework	Teacher may not have published assignments
Gate pass won't generate	Check enrollment status and internet

General

Problem	Solution
Wrong language	Tap globe icon — toggle EN/FR
Missing module	Role lacks permission — contact admin
Old data showing	Pull to refresh; check internet

PART 20 — QUICK REFERENCE TABLES

Role → Primary mobile screens

Role	First screen	Main daily modules
Gate Attendant	Gate Terminal	Gate Attendance, Kids Pickup, Live Pickups, Today's Scans
Teacher	Dashboard	Take Attendance, Class Absentees, Live Pickups, Timetable
School Admin	Dashboard	All staff modules as permissions allow
Accountant	Dashboard	Fee Search, Fee Status, Notices
Student	Dashboard	Student Portal eight modules
Guardian	Dashboard	Student Portal + Select child
Super Admin	Dashboard	Full staff + student modules

Module → API area (for IT reference)

App module	Server area
Login / Profile	/v1/login , /v1/me/context , /v1/profile
NFC scans	/v1/hardware/attendance/scan
Today's Scans	/v1/hardware/attendance/today
Class Absentees	/v1/hardware/attendance/absentees
Notify parents	/v1/hardware/attendance/absentees/notify
Take Attendance	/v1/teacher/attendance/*
Live Pickups	/v1/pickup/pending , /v1/pickup/approve
Student fees	/v1/student/fees
Gate pass QR	/v1/student/gate-pass
Notices	/v1/notices

Timetable	/v1/timetable/today
-----------	---------------------

Example credentials summary (fictional)

Person	Login	Password (example)	Primary use
Gate attendant Koffi	EMP-0091	(from admin)	Gate Terminal
Teacher Jean	j.dupont@gvis.edu.ci	(from admin)	Attendance, absentees
Admin Fatou	admin@gvis.edu.ci	(from admin)	Oversight, fee search
Accountant Ibrahim	accounts@gvis.edu.ci	(from admin)	Fee lookup
Student Marie	GVIS-2025-0142	(from admin)	Student portal
Parent Aya	aya.kouassi@gmail.com	(from admin)	Child pickup QR
Super Admin	superadmin@digitex.com	(platform)	Full access testing

PART 21 — GLOSSARY

Term	Simple meaning
Digitex Portal	The mobile app described in this manual
Gate Terminal	Simplified full-screen layout for gate attendants
NFC / RFID	Tap-to-read student or staff ID card
Gate Pass	Time-limited QR code for child pickup
Live Pickups	Screen where teachers approve child release
OTP	One-time 6-digit SMS code for manual pickup verification
Admission No.	Student's unique school ID (e.g. GVIS-2025-0142)
Staff ID	Employee identifier for login (e.g. EMP-1042)
Subject-wise attendance	Marking attendance per lesson, not only once daily
Outstanding balance	Unpaid school fees remaining
Capability	Server flag that shows/hides app modules
Session	Academic year (e.g. 2025–2026)
Snackbar	Brief message bar at bottom of screen
Module tile	Coloured square button on dashboard

Document Information

Item	Value
Manual version	1.0
App	Digitex Portal (Flutter mobile)
Web admin manual	<code>doc/markdown/user-manual.md</code>
PDF regeneration	<code>php artisan docs:generate-pdf</code> (includes this manual when configured)

Support	Contact your school administrator or Digitex platform support
