Re-enrollment Confirmation Help Manual

Digitex / Integrale Plus — school administrators, secretaries, and parents.

This guide explains how a school collects **parent confirmation** before placing a student in the next academic session. It is **not** the same as bulk Student Promotion.

1. What this module does

At year end the school must know which families will return. Digitex opens a **re-enrollment campaign**. Every active student in the current session is listed. The parent answers **yes** or **no**. The school then reviews the file (results, attendance, fees, discipline) and **approves** one student at a time into a class for the next session.

This is not bulk promotion. Promotion (People → Student Promotion) still exists for moving a whole class. When a re-enrollment campaign is open, promotion should only place students who are already **confirmed**.

This is not pre-enrollment. Pre-enrollment is for **new** candidates. Re-enrollment is for students who already study at the school.

2. Who does what

Role	What they do
School Admin / secretary	Open the campaign, invite parents, record office visits, review files, approve or reject
Parent	Confirm or decline on WhatsApp (menu option 10) or at the school office
Super Admin	Enable SMS/WhatsApp events under Configuration → Notifications if invitations do not send

Menu path in Digitex: **People → Re-enrollment Confirmations** (wording may follow your language).

3. Statuses (what each word means)

Status	Meaning
Pending (awaiting parent)	Campaign is open; the family has not answered
Partial confirmation	Parent said yes, but the minimum confirmation fee is not fully paid
Pending review	Parent said yes and the fee rule is met — waiting for school decision
Re-enrollment confirmed	School approved; student is enrolled in the next session/class
Declined by parent	Parent said they will not return
Rejected	School refused the file
Expired	Campaign closed while the parent never answered

The **Pending review** list is the secretary's daily queue.

4. School workflow (step by step)

Step 1 — Create the next academic session first

Create the **next** year (for example 2026-2027) under Academic Sessions **before** opening a campaign. Create the class sections you will assign into (or create them before you approve students).

Step 2 — Open a campaign

- Open **Re-enrollment Confirmations**.
- Click **Open Re-enrollment Campaign**.
- Fill:
 - **Name** — example: Re-enrollment 2026-2027
 - **From session** — current year
 - **To session** — next year
 - **Minimum confirmation fee** — 0 if you only need a yes/no. Otherwise the amount the family must have paid (from invoices/payments Digitex already counts) before the file enters

full review

- **Opens on / Closes on** — optional dates

- Click **Create & Open Campaign**.

Digitex immediately creates one row per active student enrolled in the **from** session.

You can have only **one campaign per target session**.

Step 3 — Invite parents

Click **Invite parents**. Digitex sends SMS and/or WhatsApp using the `reenrollment_invitation` template (Configuration → Notifications must have SMS or WhatsApp on for that event).

Parents who already answered are not contacted again. Use **Send reminders** later for families still on **Pending**. Reminders skip anyone reminded in the last 24 hours.

If you see a warning that messaging is switched off, enable the re-enrollment events under Configuration → Notifications.

Step 4 — Parent answers (WhatsApp or office)

WhatsApp (logged-in parent menu):

- Parent messages the school WhatsApp number and opens the parent portal menu.
- Send **10** — Confirm Re-Enrollment / Confirmer la réinscription.
- Digitex shows current class, next session, fee required, amount counted as paid.
- Send **1** to confirm or **2** to decline.

At the office:

- Open the student row → **Review**.
- Use **Record physical confirmation** or **Record physical decline**.
- Optionally type a parent note.

If several children share one parent WhatsApp, Digitex treats each child as a separate confirmation.

Step 5 — Review the file

Open **Review** on a student in **Pending review** or **Partial confirmation**. You will see:

- Identity, years in school, current class, proposed next class
- Exam average / annual status
- Fees paid and outstanding (current session and older debts)
- Re-enrollment minimum vs amount counted as paid
- Attendance (present / absent / late / excused)
- Discipline / conduct

You may save a **proposed next class** before the final decision.

Step 6 — Decide

Button	Result
Approve Re-enrollment	Creates (or updates) the student's enrollment in the to session in the class you select. Previous enrollment is marked promoted. Parent is notified (<code>reenrollment_confirmed</code>).
Keep Pending	Stay in the queue (for example waiting for a missing document).
Reject	Parent is notified (<code>reenrollment_rejected</code>). Student is not placed in the next session.
Reopen for parent	Use after a decline/reject if the family changed their mind. Status returns to awaiting parent. You cannot reopen a fully confirmed student from this button.

If the minimum fee is not met, Approve is blocked unless you tick **Approve even if minimum fee is not met**.

Step 7 — Students who enroll after the campaign opened

Click **Sync students**. New active enrollments in the **from** session are added as pending rows. Then invite those families.

Step 8 — Close the campaign

Click **Close campaign** when the window is over. Parents can no longer confirm on WhatsApp. Remaining **Pending** rows become **Expired**. You can **Reopen campaign** if needed; expired rows return to pending.

5. Payments and the minimum fee

Digitex does not create a special "re-enrollment invoice" by itself. It **counts payments already recorded** for the student against the campaign minimum.

- Minimum **0** — a parent yes goes straight to **Pending review**.
- Minimum greater than 0 — a parent yes with unpaid remainder stays **Partial confirmation** until enough is paid; then it moves to **Pending review** automatically when you open the review screen (payment is refreshed).

Outstanding tuition for the current year is shown for judgement. It is **not** the same figure as the re-enrollment minimum unless you chose it that way.

6. Messages parents may receive

These events must be enabled per school (Configuration → Notifications):

Event	When it is sent
reenrollment_invitation	Invite parents
reenrollment_reminder	Send reminders / single reminder on a row
reenrollment_confirmation_received	Parent confirmed and fee is met
reenrollment_partial_confirmation	Parent confirmed but fee still short
reenrollment_confirmed	School approved
reenrollment_declined	Parent declined
reenrollment_rejected	School rejected

Edit the wording under Configuration → SMS / WhatsApp templates if you want French-only school language.

WhatsApp may add a short official wrapper around the school text when Meta requires an approved template (outside the 24-hour chat window). That wrapper is configured in Infobip, not in the Digitex re-enrollment template body.

7. Typical problems

Problem	What to check
Invite button does nothing useful / nobody to notify	Everyone already invited or already answered; or messaging events are off
Parent WhatsApp has no option 10	Parent is not logged in to the parent portal on WhatsApp; send the usual chatbot login first
Parent hears / sees "no open campaign"	Campaign is closed, wrong school WhatsApp number, or student has no row (run Sync students)
Stuck on Partial confirmation	Collect the remaining minimum fee, then open Review so payment is refreshed
Cannot approve	File is not in the review queue, or fee not met and override not ticked, or next class not selected
Student missing from the list	Not enrolled as active in the from session, or student status is not active — use Sync after fixing enrollment
Bulk promotion listed the wrong children	Finish re-enrollment approvals first; promotion is a separate bulk tool

8. Suggested calendar (example)

- March — create next academic session and next-year classes.
- April — open campaign, set a confirmation fee if the board requires a deposit, invite parents.
- April-June — office confirmations + WhatsApp; weekly reminders.

- Review files as they enter Pending review; approve into next-year classes.
 - After deadline — close campaign; handle remaining Expired / Declined cases by hand.
 - Only then run bulk promotion for any leftover policy the school still uses.
-

9. Quick test (one family)

- Open a campaign from current session → next session, minimum fee 0.
- Confirm the test student appears as Pending.
- From that parent's WhatsApp, login, send **10**, then **1**.
- Digitex row becomes Pending review.
- Open Review → assign next class → Approve.
- Check Students / Enrollments: the child is active in the **to** session.

If step 3 fails, record a physical confirmation on the Review screen — the rest of the workflow is the same.
