

User Manual

Digitex School Management System

Version: Laravel 11 | **Document date:** June 22, 2026

E-Digitex SMS — Multi-Institution Education Platform
Confidential — For authorized users only

Digitex School Management System

Complete User Manual — Module by Module

Audience: School administrators, teachers, accountants, parents, and staff who are **not technical experts**.

Goal: Explain every part of the system in plain language, with real-world examples, so you know *what to click*, *why it exists*, and *what must be done first*.

> **Mobile app users:** For the Digitex Portal Android app (NFC gate, pickup, student portal, teacher attendance), see `mobile-app-user-manual.md` in this folder — a separate complete guide for all app roles with example login values and step-by-step workflows.

How to Read This Manual

Each chapter describes **one module** (one area of the software). Every chapter includes:

- **Purpose** — Why this module exists
- **Who uses it** — Which job roles need it
- **Depends on** — What you must set up before using it
- **Step-by-step** — How to use it, with example values
- **Example story** — A short scenario like a real school day
- **Common questions** — Answers a normal user would ask

Example school used throughout this manual:

- **Platform URL (all schools):** <https://e-digitex.com/>
 - **School name:** Green Valley International School
 - **Short code:** GVIS
 - **Current session:** 2025-2026
 - **Sample class:** Grade 5 Section A
 - **Sample student:** Marie Kouassi, Admission No. GVIS-2025-0142
 - **Sample teacher:** Mr. Jean Dupont
 - **Sample parent phone:** +225 07 12 34 56 78
-

PART A — BEFORE YOU START

Module A1: Logging In and Understanding Your Screen

Purpose

The login screen is the front door. After login, you see the **dashboard** (summary page), the **sidebar menu** on the left, and the **top bar** with search, notifications, and school name.

Who uses it

Everyone: Super Admin, School Admin, Teacher, Student, Parent, Accountant, Staff.

Step-by-step — First login

Important: All schools use the **same website address**. There is no separate link per school (no subdomains).

- Open your browser and go to: **<https://e-digitex.com/login>**

(You can also start at **<https://e-digitex.com/>** — it redirects to login.)

- Enter your **email** or **username**. Example: `admin@gvis.edu.ci`
- Enter your **password**. Example: (provided by your IT officer)
- Click **Login**.
- The system opens the school linked to your account. If you manage **more than one school** (Head Officer / Super Admin), click the **building icon** top-right and choose **Green Valley International School** (or another assigned school).

Common questions (login URL)

Q: My colleague gave me a different link — is it wrong?

A: The official address for every school is **<https://e-digitex.com/>**. Bookmark that page only.

Q: How does the system know my school if the URL is the same for everyone?

A: Your **user account** is tied to your institution when it was created. Multi-school users pick the active school from the **institution switcher** in the header after login.

Top bar — what each button means

Element	What it does (simple words)
Menu (☰)	Opens/closes the left menu
Search (🔍)	Click the small circle, then type a name — finds students, staff, invoices, pages
Year badge (2025-2026)	Shows which academic year you are working in
Bell (🔔)	Alerts inside the app — new invoice, request approved, notice published, etc.
Building icon	Switch to another school (Head Officers / Super Admin)
Profile	Change password, photo, personal details

Example story

Mrs. Aya is the school secretary. She logs in Monday morning, switches to Green Valley, and sees on the dashboard: **420 active students, 18 teachers, and 12 unpaid invoices this week**. She clicks the bell and sees: *"Marie Kouassi's parent submitted a leave request."*

Common questions

Q: I forgot my password.

A: Use **Forgot password** on the login page, or ask your School Admin to reset it.

Q: I don't see a menu item my colleague has.

A: Your **role** or **permissions** may be different, or your school's **subscription package** may not include that module.

Q: Why does the dashboard show different numbers from last year?

A: Make sure the **active academic session** is set to 2025-2026 under Academic Sessions.

Module A2: Dashboard

Purpose

The dashboard is your **control room**. It shows the most important numbers and shortcuts for **your role** — not everyone sees the same dashboard.

Who uses it

All logged-in users (content varies by role).

Depends on

- Institution must exist and be selected
- Active academic session should be configured
- Data in other modules (students, invoices, etc.) fills the statistics

What you typically see

Role	Example widgets
School Admin	Total students, staff, enrollment, financial summary, timetables count
Teacher	Class-related shortcuts, pending pickups, own timetable
Accountant	Fees collected, outstanding balances, recent payments
Student / Parent	Notices, marks link, own fees (where enabled)
Super Admin	All schools overview, subscriptions, platform stats

Example story

The School Admin opens the dashboard on the first day of term and sees **Enrollment: 420** but expects 450. She goes to **Student Enrollments** to find 30 students not yet placed in a class.

Common questions

Q: Numbers look wrong.

A: Check you selected the correct school (building icon) and the session **2025-2026** is marked as **current**.

Module A3: Global Search and In-App Notifications

Purpose

- **Search:** Find anything quickly without clicking through menus.
- **Notifications (bell):** See what happened recently — payment recorded, exam published, pickup scanned, etc.

Who uses it

All staff roles with login access. Students/parents see limited search results.

How to search

- Click the **small magnifier circle** in the top bar (it expands).
- Type at least **2 letters**, e.g. **Marie** or **INV-2025**.
- Click a result to open that student, invoice, or page.

Notifications

- Red badge = unread count.
- Click an item to open the related page; it marks as read.
- **Mark all read** clears the badge.

Your School Admin can turn off certain alert types under **Configuration → Notification Settings → In-App (Bell)** column.

Common questions

Q: I paid fees but parent says no SMS.

A: SMS is separate from the bell. Check **Configuration → Notification preferences → Payment Received → SMS** is ON, and the school has SMS credits.

PART B — PLATFORM ADMINISTRATION (Usually Super Admin / Head Officer)

Module B1: Institutions (Schools)

Purpose

An **institution** is one school or university in the system. Super Admin creates each tenant (e.g. Green Valley, Blue Coast Academy).

Who uses it

Super Admin primarily. Head Officers see assigned institutions only.

Depends on

Nothing — this is usually step one for a new deployment.

Step-by-step — Create a school

- Menu → **Institutions** → **Add New**
- Fill example values:
 - **Name:** Green Valley International School
 - **Code:** GVIS
 - **Type:** Secondary
 - **Email:** contact@gvis.edu.ci
 - **Phone:** +225 27 00 00 00 00
 - **Address:** Cocody, Abidjan
- Upload **logo** (optional) — appears on reports and mobile app login.
- Save.
- Assign a **subscription/package** so modules are enabled (see Module B7).

Example story

Digitex platform owner adds a new client school "Lycée Moderne de Yamoussoukro" with code **LMY** and assigns the "Standard Package" subscription.

Depends on for other modules

Almost **everything** else requires an institution to exist first.

Common questions

Q: Can one person manage two schools?

A: Yes — **Head Officer** role with multiple institutions assigned, or Super Admin global view.

Module B2: Campuses

Purpose

If one school has **multiple physical sites** (Main Campus, Annex Branch), campuses organize students and staff by location.

Who uses it

School Admin, Super Admin.

Depends on

Institution created.

Example

- Institution: Green Valley International School
- Campus 1: **Main Campus — Cocody**
- Campus 2: **Annex — Bingerville**

When registering Marie Kouassi, assign her to **Main Campus — Cocody**.

Common questions

Q: We have only one building. Do we need campuses?

A: Optional. Many schools create one default campus and use it for all records.

Module B3: Head Officers

Purpose

A **Head Officer** oversees **several schools** (e.g. a chain of 5 academies). They switch between schools using the header switcher or view a **Global Dashboard**.

Who uses it

Super Admin creates Head Officer accounts.

Depends on

Institutions must exist.

Step-by-step

- Menu → **Head Officers** → **Create**
- Example:
 - **Name:** Mr. Ibrahim Koné
 - **Email:** ibrahim.kone@digitex-group.com
 - **Password:** (temporary — user should change)
 - **Assign institutions:** Green Valley, Blue Coast, Sunrise Primary
- Save. Mr. Koné logs in and uses the building icon to switch schools.

Common questions

Q: Difference between Head Officer and School Admin?

A: **School Admin** manages **one** school deeply. **Head Officer** monitors **many** schools at summary level.

Module B4: Roles and Permissions

Purpose

Controls **who can do what**. Example: allow teachers to mark attendance but **not** delete invoices.

Who uses it

Super Admin, School Admin (for their institution's custom roles).

Depends on

Modules seeded in system (done during installation).

Plain language

- **Role** = job title bucket (Teacher, Accountant)
- **Permission** = single action (e.g. `invoice.create` = can create invoices)

Step-by-step — Create custom role "Senior Accountant"

- Menu → **Roles** → **Add Role**
- Name: **Senior Accountant**, Institution: Green Valley
- Open **Assign Permissions**
- Enable: Invoices (view, create), Payments (view, create), Fee Structures (view)
- Disable: Student delete, Settings manage
- Save.
- Assign this role to user `finance@gvis.edu.ci` in Staff module.

Common questions

Q: Teacher sees "403 Forbidden".

A: Their role lacks permission for that page. School Admin adds the permission.

Module B5: Configuration Hub (Critical — SMS, WhatsApp, Email, Notifications)

Purpose

The **Configuration** area is where the school connects the system to the **outside world**: email server, SMS gateway, WhatsApp Business API, notification toggles, school hours, academic calendar dates, and **display currency** (see **Module B9**).

Who uses it

Super Admin, Head Officer, School Admin.

Super Admin only (system-wide SMS/WhatsApp defaults): must switch to **Global View** in the top header first — see **B5.0** below.

Depends on

Institution selected in header (or **Global View** for platform-wide communication defaults).

B5.0 System Default SMS & WhatsApp (Super Admin — Global View only)

Purpose: Set the **platform-wide** SMS and WhatsApp providers and API credentials. These replace static `.env` values (`SMS_DRIVER` , `MOBISHASTRA_*` , etc.) for every school that chooses **System Default (Digitex Credits)**.

Who uses it: Super Admin only.

Important — you must use Global View:

- Log in at <https://e-digitex.com/login>
- Click the **building icon** (institution switcher) in the top-right header
- Select **Global View** — the header should show "Global View", not a school name
- Menu → **Configuration** → **ID Sender SMS** tab
- Confirm the blue **Global Mode** badge appears on the Communication Setup card

If you open Configuration while a school (e.g. Green Valley) is selected, you will only edit **that school's** settings — not the system defaults. A yellow warning appears reminding you to switch to Global View.

Step-by-step — configure system defaults:

- Under **Provider Availability Control**, tick which providers schools may use individually (e.g. Mobishastra, Infobip, Twilio, SignalWire for SMS; Meta, Infobip, Twilio for WhatsApp)
- Set **System Default SMS Provider** — e.g. **Mobishastra**
- Set **System Default WhatsApp Provider** — e.g. **Meta**
- Open the **API Credentials** tabs and enter platform credentials (example Mobishastra):

Field	Example value
Username (Profile ID)	INTEGRALE
Password	(your Mobishastra password)
Sender ID	ARCHIDIOKIN

- Click **Save Changes**
- Use **Configuration → Test Notifications** to send a test SMS/WhatsApp

How schools use this:

- Each school can set **Active SMS Provider = System Default (Digitex Credits)** — messages use your Global View credentials and deduct **SMS credits** from that school
- Or a school can pick its **own** provider (e.g. Twilio) and enter its own API keys — no credit deduction for that channel

Common questions:

Q: I saved Mobishastra in `.env` but the UI still shows another provider.

A: Global View settings in the database **override** `.env`. Change them in Global View, or remove the global DB rows to fall back to `.env`.

Q: Can I configure this without Global View?

A: No. System defaults are stored with no institution (`Global View` context). Always switch via the header building icon first.

B5.1 SMTP (Email) — Example Setup

Purpose: Send invoice emails, password resets, and email notifications.

Steps:

- Configuration → **SMTP** tab
- Example values (using Gmail-style SMTP — your IT team provides real ones):

Field	Example value
Mail Host	smtp.gmail.com
Port	587
Encryption	TLS
Username	notifications@gvis.edu.ci
Password	(app password from Google)
From Address	notifications@gvis.edu.ci
From Name	Green Valley School

- Click **Save**, then **Send Test Email** to `secretary@gvis.edu.ci`.
- If test succeeds, enable **Email** column for events like *Invoice Created* under Notification Settings.

Common question: *Emails go to spam.* — Ask IT to set SPF/DKIM records for your domain.

B5.2 SMS Provider — Example Setup (School level)

Purpose: Send fee reminders, OTP codes, arrival SMS to parents.

Note for Super Admin: Platform-wide defaults are configured in **B5.0 (Global View)**. This section is for a **single school's** own provider or for choosing **System Default (Digitex Credits)**.

Supported providers (examples): Mobishastra, Infobip, Twilio, SignalWire.

Steps:

- Select the school in the header (or stay in Global View only for B5.0)
 - Configuration → **SMS / WhatsApp** tab
 - Choose **Active SMS Provider**:
- **System Default (Digitex Credits)** — uses Super Admin global config (B5.0); credits deducted
- **Twilio** (or other) — school uses its own API keys; no credit deduction
- If using your own provider, fill credentials (example for Twilio):

Field	Example value
Account SID	ACxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx
Auth Token	(secret — paste once, stored encrypted)
From Number	+15551234567

- **Sender ID** (if provider uses alphanumeric): `GVIS`
- Save → **Send Test SMS** to `+2250712345678`
- Message should arrive: `*"Test message from E-Digitex (14:32:05)"*`

Mobishastra example:

Field	Example
User	<code>gvis_sms_user</code>
Password	(secret)
Sender ID	<code>GVIS</code>

Credits: SMS costs credits. Super Admin recharges under **Configuration → Recharging**.

B5.3 WhatsApp Provider — Example Setup

Purpose: Parents receive homework alerts, payment confirmations, pickup messages on WhatsApp.

Common providers: Meta Cloud API, Infobip, Twilio.

Meta (Facebook) WhatsApp example:

Field	Example value
Phone Number ID	123456789012345
Business Account ID	987654321098765
Access Token	EAAxx... (long token from Meta Developer Console)

Twilio WhatsApp example:

Field	Example
WhatsApp From	whatsapp:+14155238886

Steps:

- Select **WhatsApp Provider** = Meta (or Twilio)
- Paste credentials → Save
- Test tab → send test WhatsApp to parent phone
- Under **Notification Settings**, enable WhatsApp for **Payment Received**, **Student Arrival**, etc.

Webhook for chatbot: Point Meta/Twilio webhook to:

`https://e-digitex.com/api/v1/chatbot/webhook/meta` (or `twilio`)

B5.4 Notification Preferences (SMS / WhatsApp / Email / In-App Bell)

Purpose: Decide **which events** send **which type** of message.

Steps:

- Configuration → **Notification Settings**
- You see a table of events, e.g.:

Event	SMS	WhatsApp	Email	In-App (Bell)
Payment Received	☒	☒	☐	☒
Invoice Created	☐	☒	☒	☒

Student Arrival (RFID)	☒	☒	☐	☐
Exam Results Published	☐	☒	☐	☒

- Check boxes → **Save Changes**

Example policy at Green Valley:

- All fee events → WhatsApp ON (parents prefer WhatsApp)
- Staff leave requests → In-App bell ON for admins only
- Marketing bulk SMS → OFF (use Reminders module manually instead)

Default behavior: If you never saved preferences, **in-app bell** is ON by default for most events; SMS/WhatsApp are OFF until you enable them (to avoid accidental charges).

B5.5 School Year and Gate Timings

Purpose: Tell the system when school starts, when a student is "late", and how long between check-in and check-out at RFID gates.

Setting	Example	Meaning
Academic Start Date	2025-09-01	First day of year
Academic End Date	2026-07-15	Last day
School Start Time	08:00	Classes begin
School End Time	15:00	Classes end
Late Margin	15 minutes	Arrival before 08:15 = on time
Double Tap Wait	15 minutes	Must wait 15 min between IN and OUT scan

Depends on: Used by **Student Attendance** (hardware and manual) and reports.

B5.6 SMS Templates

Purpose: Edit the **wording** of automatic messages. Templates use tags like `$StudentName`, `$Amount`, `$SchoolName`.

Example template — Payment Received:

Dear Parent, payment of \$Amount for \$StudentName has been received.
Remaining Balance: \$Balance. Thank you, \$SchoolName.

Steps: Configuration → SMS Templates → select event → edit body → Save.

B5.7 Enabled Modules (Super Admin)

Purpose: Turn entire feature areas on/off per school subscription.

Example: Sunrise Primary package includes Students + Invoices but NOT Elections. The Elections menu will not appear for that school.

Module B6: Settings (School Operational Rules)

Purpose

Different from Configuration: **Settings** controls **academic rules** inside daily operations — lock attendance after 7 days, lock exam marks, block report cards if fees unpaid.

Who uses it

School Admin (with `setting.manage` permission).

Depends on

Institution selected.

Example values at Green Valley

Setting	Value	Effect
Lock attendance after	7 days	Teachers cannot edit last week's attendance
Lock exams after	30 days	Marks frozen after a month
Block reports on debt	ON	Marie cannot download report card if she owes 50,000 XOF

LMD validation threshold	50%	University pass rule
Active marking periods	Term 1, Term 2	Teachers only enter marks for open terms

Common questions

Q: Teacher cannot edit yesterday's attendance.

A: Grace period may have expired — Admin increases **attendance grace period** in Settings.

Module B7: Packages and Subscriptions

Purpose

Digitex is sold as **packages** (bundles of modules). Each school needs an **active subscription** to use the system.

Who uses it

Super Admin.

Example

- **Package name:** Standard Secondary
- **Modules included:** Students, Invoices, Attendance, Exams, Notices
- **Subscription:** Green Valley, Start 2025-01-01, End 2026-01-01, Status Active

If subscription expires, users see a warning; after grace period access may be limited.

Module B8: Audit Logs

Purpose

Security trail — who changed what and when (Super Admin investigation).

Who uses it

Super Admin only.

Example entry

"User admin@gvis.edu.ci updated Invoice INV-2025-0089 at 2025-11-03 14:22"

Module B9: Currency Settings

Purpose

Set how **money amounts are displayed** for your school — currency code (USD, CDF, XOF, etc.), symbol, symbol position, and decimal places. This affects invoices, payments, dashboards, fee reports, and online pay pages.

Who uses it

School Admin, Head Officer, Super Admin (with `currency.view` permission).

Where to find it

Menu → Configuration → Currency

(or **Finance → Currency** on some layouts)

Depends on

- A school must be selected in the header (not Global View for per-school currency).

Step-by-step

- Switch to your school in the header (e.g. **Green Valley International School**).
- Open **Configuration → Currency**.
- **Primary Currency** — choose ISO code from the list (e.g. **USD — US Dollar (\$)** or **CDF — Congolese Franc**).
- **Display Symbol** — adjust if your school uses a custom abbreviation (e.g. `FC`, `CFA`). Defaults to the standard symbol for the selected currency.

- **Symbol Position** — choose **Before amount** (\$ 1,250.00) or **After amount** (1,250.00 \$).
- **Decimal Places** — usually **2** for money; use **0** if your school never shows cents.
- Check the **Live Preview** panel on the right.
- Click **Save Currency Settings**.

Example story

Green Valley in Kinshasa sets **CDF** with symbol **FC**, symbol **before** amount, **0** decimal places. Invoices show **FC 125,000** instead of **\$ 125.00**. A sister school in Abidjan keeps **XOF** with **CFA** after the amount.

Where this applies

Area	Effect
Invoices & payments	Line totals, balance due, receipts
Student fee balances	Outstanding amounts on student profile
Dashboards	Collection totals for admins and accountants
Online pay page	Amount shown to parents paying via Mobile Money
Reports	Class fee summary, financial exports

Each school can have its own currency. Switch institution in the header to configure another school.

Common questions

Q: I changed currency but old invoices still look wrong?

A: Display updates immediately for all screens. Historical amounts are stored as numbers — only the **symbol and formatting** change, not the stored values.

Q: Can we use two currencies?

A: The **display currency** is one per school. Some institutions store a **secondary currency** on the institution profile for reference; day-to-day billing uses the Currency Settings page.

Q: Parents pay in CDF but we report in USD?

A: Set the display currency to what parents and staff should see on invoices. Payment gateways (PawaPay, CinetPay) use the currency configured for online pay at transaction time.

PART C — ACADEMICS MODULES

Module C1: Academic Sessions

Purpose

An **academic session** is one school year, e.g. **2025-2026**. Almost all enrollments, fees, and exams belong to a session.

Who uses it

School Admin, Registrar.

Depends on

Institution.

Step-by-step

- Menu → **Academic Sessions** → **Add**
- **Name:** 2025-2026
- **Start date:** 2025-09-01
- **End date:** 2026-07-15
- Check **Set as current session** ☒
- Save.

Only **one** session should be "current" at a time.

Example story

Green Valley runs two sessions in database (2024-2025 archived, 2025-2026 current). All new enrollments automatically tie to 2025-2026.

Modules that depend on this

Student Enrollments, Fee Structures, Invoices, Exams, Reports.

Common questions

Q: We started a new year but old fees show.

A: Filter invoices by session 2025-2026, or generate new fee structures for the new session.

Module C2: Departments (Universities)

Purpose

Groups university subjects and staff — e.g. **Department of Computer Science, Department of Economics.**

Who uses it

University / LMD institutions.

Depends on

Institution, Academic session (for enrollments).

Example

Department: **Sciences** → Programs: **Licence Informatique, Licence Mathématiques**

School (K-12) note

Primary/secondary schools may skip Departments and use Grade Levels directly.

Module C3: Grade Levels

Purpose

The **grade/year** label: Grade 1, Grade 2, ... Form 6, CP, CE1 (French system), etc.

Who uses it

School Admin.

Depends on

Institution.

Example at Green Valley

Grade name	Order
CP	1
CE1	2
...	...
Terminale	12

Depends on for

Class Sections, Fee Structures (fees often differ per grade).

Module C4: Class Sections

Purpose

A **class section** is a group of students taught together: **Grade 5 Section A**, **Grade 5 Section B**.

Who uses it

School Admin, Teachers (view own classes).

Depends on

Grade Levels, Academic Session, optionally Staff (homeroom teacher).

Step-by-step

- **Class Sections** → **Add**
- **Name:** Section A
- **Grade Level:** Grade 5

- **Homeroom Teacher:** Mr. Jean Dupont
- **Capacity:** 35
- Save.

Example story

Green Valley has Grade 5 split into A (35 students) and B (32 students). Marie Kouassi is in **Grade 5 Section A**.

Modules that depend on this

Enrollments, Timetables, Attendance (by class), Exam marks, Assignments.

Module C5: Subjects

Purpose

Courses taught: **Mathematics, French, Physical Education, Physics.**

Who uses it

School Admin, University Admin.

Depends on

Institution; for universities also **Department** or **Academic Unit**.

Example

Subject	Code	Type
Mathematics	MATH-G5	Core
English	ENG-G5	Core
Art	ART-G5	Optional

Module C6: Class Subjects (Subject Allocation)

Purpose

Links **which subjects** are taught in **which class**, and **which teacher** teaches each.

Who uses it

School Admin, Academic coordinator.

Depends on

Class Sections + Subjects + Staff (teachers).

Example

Grade 5 Section A:

Subject	Teacher
Mathematics	Mr. Jean Dupont
French	Mrs. Aminata Traoré
Science	Mr. Paul N'Guessan

Depends on for

Timetables, subject-wise attendance, exam marks per subject.

Module C7: Timetables

Purpose

Weekly schedule — which subject happens **Monday 08:00-09:00** in which room.

Who uses it

School Admin creates; Teachers and Students view.

Depends on

Class Subjects allocated, Teachers assigned.

Example (Grade 5A — excerpt)

Day	Time	Subject	Teacher	Room
Monday	08:00-09:00	Mathematics	Mr. Dupont	Room 12
Monday	09:00-10:00	French	Mrs. Traoré	Room 12

Print / Download PDF available for posting on classroom door.

Common questions

Q: Teacher clash — same time two classes.

A: System may warn on availability check; adjust slot or assign different teacher.

Module C8: Assignments (Homework)

Purpose

Teachers publish homework with **title**, **description**, **deadline**. Students and parents see it in portal and mobile app.

Who uses it

Teachers create; Students/Parents view.

Depends on

Class Sections, Subjects, Teacher permissions.

Example

- **Title:** Exercise pages 45–48
- **Subject:** Mathematics
- **Class:** Grade 5A

- **Due:** 2025-10-15 23:59
- **Created by:** Mr. Dupont

Marie's parent sees this in the mobile app under **Homework**.

Module C9: Programs and Academic Units (LMD / University)

Purpose

LMD (Licence-Master-Doctorat) structure:

- **Program:** e.g. Licence Informatique (6 semesters)
- **Academic Unit (UE):** e.g. UE101 — Algorithmics (groups subjects)

Who uses it

University administrators.

Depends on

Departments, Academic Sessions.

Example flow

- Create Program **Licence Informatique**, 6 semesters, 3 years
 - Create UE **UE101** Semester 1
 - Assign subjects **Algorithmics**, **Programming 1** to UE101
 - Enroll student into Program via **University Enrollments**
-

PART D — PEOPLE MODULES (Students & Parents)

Module D1: Student Parents (Guardians)

Purpose

Store **mother, father, guardian** contact details and link to portal login for fee viewing and pickup.

Who uses it

School Admin, Registrar.

Depends on

Institution.

Example record

Field	Value
Father name	Kouassi Emmanuel
Father phone	+225 07 12 34 56 78
Mother name	Kouassi Aya
Primary contact	Father
User account	parent.kouassi@gvis.edu.ci

Depends on for

Student registration (link child), SMS notifications, Pickup QR, mobile app.

Module D2: Students

Purpose

The **heart of the system** — every learner's profile: identity, photo, class, RFID card, login.

Who uses it

School Admin, Registrar; Teachers view limited info.

Depends on

Parents (optional at create), Grade/Class (can assign later), Campus.

Step-by-step — Register Marie Kouassi

- **Students** → **Add Student**
- Personal:
 - **First name:** Marie
 - **Last name:** Kouassi
 - **Admission No.:** GVIS-2025-0142 (auto or manual)
 - **Date of birth:** 2014-03-12
 - **Gender:** Female
- Link **Parent:** Kouassi family record
- **Campus:** Main Campus — Cocody
- Optional hardware:
 - **RFID UID:** A1B2C3D4 (printed on card)
 - **QR token:** (auto-generated for gate pass)
- Upload **photo**
- Save → system can create **student login** (shortcode + password)

Example story

Marie receives login shortcode **GVIS0142** and password. She uses the mobile app to see homework and results.

Modules that depend on Students

Enrollments, Invoices, Attendance, Exams, Pickup, Requests, Elections.

Common questions

Q: Gate doesn't recognize card.

A: Verify RFID UID in student profile matches physical card; check for typos (0 vs O).

Module D3: Student Enrollments (Schools K-12)

Purpose

Places a student in a **class section** for the **current session**.

Who uses it

Registrar, School Admin.

Depends on

Students, Class Sections, Academic Session (current).

Step-by-step

- **Enrollments** → **New Enrollment**
- **Student:** Marie Kouassi
- **Class:** Grade 5 Section A
- **Session:** 2025-2026
- **Status:** Active
- Save.

Without enrollment, Marie won't appear in class attendance lists or class-based invoices.

Module D4: University Enrollments

Purpose

Enrolls student in **Program / Semester / UE** path (universities).

Depends on

Programs, Academic Units, Students.

Example

Marie (university student) → Program **Licence Informatique** → Semester 2 → UE **UE202**

Module D5: Student Promotion

Purpose

Move a **whole cohort** to the next grade at year end (e.g. all Grade 5 → Grade 6).

Who uses it

School Admin.

Depends on

Grade Levels, Enrollments, new Class Sections for next grade.

Example

Select **Grade 5 Section A** → Promote to **Grade 6 Section A** for session 2026-2027.

Module D6: Student Transfers

Purpose

Move one student **out** to another school or **in** from elsewhere, with printable transfer certificate.

Example

Marie transfers from Green Valley to Blue Coast — admin marks transfer, prints document for new school.

PART E — ATTENDANCE & REQUESTS

Module E1: Student Attendance (Manual)

Purpose

Record who is **present**, **absent**, **late** each day or per subject.

Who uses it

Teachers, School Admin.

Depends on

Enrollments, Class Sections, optionally Timetables (subject mode).

Step-by-step — Daily attendance Grade 5A

- **Attendance** → **Mark Attendance**
- Select **Class**: Grade 5 Section A
- **Date**: 2025-10-06
- Mark each student: Marie = Present, Paul = Late, Aisha = Absent
- Save.

Example story

Mr. Dupont marks morning attendance on his phone browser. At 08:20 Marie is marked **Late** (school starts 08:00, margin 15 min).

Module E2: Student Attendance (Hardware / RFID Gate)

Purpose

Automatic check-in when student taps card at gate — no manual typing.

Who uses it

Gate devices (configured by IT); results viewed by Admin/Teachers.

Depends on

Student RFID/NFC UID in profile, **Configuration** school timings, **HARDWARE_SECRET** set by IT, SMS preferences for arrival messages.

Flow (simple)

- Marie taps card at gate 07:55
- System records **Check-In**
- Parent receives WhatsApp: *"Marie arrived at Green Valley at 07:55"* (if enabled)
- Marie taps again at 15:10 → **Check-Out** / Departure message

Common questions

Q: Double tap too fast shows error.

A: Increase **Double Tap Wait Time** in Configuration (e.g. 15 minutes between IN and OUT).

Module E3: Attendance Analytics

Purpose

Charts and reports — absence trends, class comparison, monthly summaries.

Depends on

Attendance data from Module E1/E2.

Module E4: Student Requests (Tickets)

Purpose

Students or parents **ask permission** for absence, lateness, sick leave, early exit — tracked with ticket number.

Who uses it

Students/Parents submit; Admin approves/rejects.

Depends on

Student enrolled, notification preferences for updates.

Example

- Marie's mother submits **Sick leave** Oct 6–7, reason: fever
- Ticket: **REQ-K7M2P9QX**
- Secretary sees bell notification: *New student request*
- Admin approves → parent gets WhatsApp: *Request REQ-K7M2P9QX approved*

Common questions

Q: Teacher cannot see requests.

A: By design teachers may not view all requests — only Admin roles process them.

PART F — STAFF & HR

Module F1: Staff

Purpose

Employee records: teachers, accountants, guards, cleaners — linked to login account.

Who uses it

School Admin, HR.

Depends on

Institution, Roles.

Example — Create Mr. Jean Dupont

Field	Value
Name	Jean Dupont
Email	j.dupont@gvis.edu.ci
Role	Teacher
Employee ID	EMP-T-014
RFID (staff gate)	STAFF-9F3A2B
Department	Sciences
Phone	+225 05 11 22 33 44

Module F2: Staff Attendance

Purpose

Same concept as student attendance but for employees — manual or RFID.

Module F3: Staff Leave

Purpose

Staff request days off; Admin approves.

Example

Mr. Dupont requests leave Dec 20–22, type **Annual leave**, reason: family travel. Status **Pending** → Admin approves → Jean gets bell notification.

Module F4: Salary Structures

Purpose

Define pay components: basic salary, allowances, deductions per staff grade.

Example

Teacher Grade A: Base 250,000 XOF + Transport 25,000 XOF.

Module F5: Payroll

Purpose

Generate **monthly payslips** from salary structures.

Flow

- Ensure salary structures assigned
- **Payroll** → Generate for **November 2025**

- Review list → Confirm
 - Staff view/download payslip PDF
-

PART G — EXAMINATIONS & RESULTS

Module G1: Exams

Purpose

Define an examination event: **First Term Exam 2025, Mock BAC**, etc.

Depends on

Academic Session.

Example

- **Name:** First Term Examination 2025
- **Session:** 2025-2026
- **Category:** Term Exam
- **Status:** Draft → Published (when ready)

Publish triggers student notifications and makes results visible (if marks entered).

Module G2: Exam Schedules

Purpose

Timetable of exam dates per subject/class; generate **admit cards**.

Example

Date	Subject	Class	Room	Time
2025-11-10	Mathematics	Grade 5A	Hall B	08:00

Module G3: Exam Marks (Marks Entry)

Purpose

Teachers enter scores per student per subject.

Depends on

Exams, Class Subjects, Enrollments, Settings (active periods, exam lock).

Example

Marie Kouassi — Mathematics — First Term: **16/20**

Module G4: Result Cards and Academic Reports

Purpose

Print **report cards, bulletins, transcripts** (including full LMD transcript).

Depends on

Published exams, marks entered, optionally fee clearance (Settings block on debt).

Example story

Marie owes 75,000 XOF. **Block reports on debt** is ON — report card PDF shows message to visit finance office. After payment, report unlocks.

PART H — FINANCE MODULES

Module H1: Fee Types

Purpose

Categories of charges: **Tuition, Registration, Transport, Canteen, Exam Fee.**

Example

Fee Type	Code
Tuition	TUITION
Transport	TRANSPORT

Module H2: Fee Structures

Purpose

How much each grade pays, in **how many installments (tranches).**

Depends on

Fee Types, Grade Levels, Academic Session.

Example — Grade 5 Tuition 2025-2026

Tranche	Due date	Amount (XOF)
Tranche 1	2025-09-15	150,000
Tranche 2	2025-12-15	150,000
Tranche 3	2026-03-15	150,000

Total annual tuition: **450,000 XOF**

Module H3: Invoices

Purpose

Bill sent to student/parent for fees owed.

Depends on

Fee Structures, Students.

Step-by-step — Generate class invoices

- **Invoices** → **Bulk Generate**
- **Class:** Grade 5 Section A
- **Fee structure:** Grade 5 Tuition Tranche 1
- Generate → creates INV-2025-0142 for Marie, etc.

Example invoice

- **Number:** INV-2025-0089
- **Student:** Marie Kouassi
- **Amount:** 150,000 XOF
- **Status:** Unpaid

Parent receives WhatsApp + bell notification if enabled.

Module H4: Payments

Purpose

Record money received — cash, bank transfer, mobile money.

Example

- Parent pays 150,000 XOF at office
- Accountant opens **Payments** → **Record Payment**
- **Invoice:** INV-2025-0089

- **Amount:** 150,000
 - **Method:** Cash
 - **Date:** 2025-09-14
 - Save → Invoice status **Paid**, parent notified.
-

Module H5: Student Balances and Statements

Purpose

See total owed across all invoices; download **PDF statement** for parent meetings.

Example statement line

Date	Description	Debit	Credit	Balance
2025-09-01	Invoice INV-2025-0089	150,000	—	150,000
2025-09-14	Payment TRX-9912	—	150,000	0

Module H6: Budgets and Fund Requests

Purpose

Internal school spending control — departments get **budget envelopes**; staff **request funds** for activities.

Example

- **Budget:** Science Department 2025-2026 — Allocated **2,000,000 XOF**, Spent **800,000 XOF**
 - **Fund request:** Mr. N'Guessan requests **150,000 XOF** for lab equipment → Finance approves → spent amount increases
-

Module H7: Payment Methods Configuration

Purpose

Configure which payment options your school accepts — **Cash**, **Bank transfer**, **Orange Money**, **Airtel Money**, **M-Pesa/Vodacom**, and **Card/Online** — instead of hardcoded choices. These settings control both **office payment recording** and **parent online pay pages**.

Menu path

Finance → Fees & Collection → Payment Methods

Step-by-step — Enable methods

- Log in as **School Admin** or **Accountant**.
- Open **Payment Methods**.
- Toggle **Online payments** ON to allow public pay links.
- For each payment method row:
 - Check **Enabled**
 - Fill **Merchant code** (Mobile Money) or **Bank details** (transfer)
 - Add **Instructions** parents will see on the pay page
 - Toggle **Manual proof upload** ON (recommended backup when gateway is unavailable).
 - Click **Save settings**.

Example — Orange Money (DRC)

Field	Example value
Merchant code	123456
Instructions	Dial *144# → Pay Merchant → enter 123456 → amount → confirm PIN

Depends on

Finance module enabled, active institution selected (building icon, top-right).

Module H8: Online Invoice Payment Links

Purpose

Share a **secure pay link** with parents so they can pay fees **without logging in**. Each invoice can have a unique token URL.

How it works

- Accountant generates or opens an invoice (Module H3).
- On the invoice detail page, copy the **Online Payment Link** (or regenerate if needed).
- Send link via **WhatsApp, SMS**, or email.
- Parent opens link → sees amount due and payment options.

Public invoice lookup (no link)

If the parent lost the link:

- Open **https://e-digitex.com/pay** (or your school domain + `/pay`).
- Enter **Invoice number** (e.g. INV-2025-0089) and **Student admission number**.
- System finds the invoice and opens the pay page.

Pay page tabs

Tab	What happens
Pay instantly	Mobile Money via PawaPay, CinetPay, or Flutterwave — invoice marked Paid automatically
Upload proof	Parent submits receipt + transaction ID — status Pending until accountant approves (Module H10)

Example workflow

- Invoice INV-2025-0089 — Marie Kouassi — 150,000 CDF unpaid
- Accountant copies link: `https://e-digitex.com/pay/abc123...`
- Sends WhatsApp to parent

- Parent pays via Orange Money → invoice **Paid** within seconds
-

Module H9: Online Payments (Connecting Mobile Money)

> **Read this first — in plain words.**

> This page lets parents pay school fees from their phone using **Mobile Money** (Orange Money, Airtel Money, M-Pesa). To make this work, your school signs up with a **payment company** (we support **PawaPay**, **CinetPay**, or **Flutterwave**), copies a few secret codes from them, and pastes those codes into Digitex. Once done, every time a parent pays, the invoice is marked **Paid by itself** — no manual work for your accountant. You only set this up **once**.

How it works (the big picture)

Think of the payment company as a **cashier standing between the parent and your school**:

- The parent clicks the pay link and chooses Mobile Money.
- The payment company asks the parent to confirm on their phone.
- The parent enters their PIN and the money is collected.
- The payment company **tells Digitex "this is paid"**, and the invoice turns green automatically.

You don't need to understand the technical details — you just need to **connect the two** by copying codes. Follow the steps below for whichever company you choose.

Which company should I pick?

You only need **one**. Pick based on what suits your school:

Company	Why choose it	Works with (DRC)
PawaPay (easiest, recommended)	Parent just gets a PIN prompt on their phone — no extra page	Orange, Airtel, Vodacom M-Pesa
CinetPay	Very common in French-speaking Africa; opens a familiar payment page	Orange, Airtel, M-Pesa

Flutterwave	Also accepts bank cards, not just Mobile Money	Mobile Money + cards
--------------------	--	----------------------

> **Tip:** If unsure, start with **PawaPay**. It is the simplest for parents.

What you need before you start

- A registered account with **one** payment company (free to sign up — links below).
- The **secret codes** they give you (called "API keys" — think of them as your shop's password).
- Around **15 minutes**, once.

Always test first ("Sandbox" vs "Production")

Every company gives you **two modes**:

- **Sandbox / Test** = a practice mode using fake money. Use this first to make sure everything works.
- **Production / Live** = real mode that collects real money. Switch to this **only after** your test succeeds.

You will see this choice as **Environment** on the Payment Methods page. Start on **Sandbox**, test with a small invoice, then change to **Production**.

Step 1 — Set up in Digitex (same for all companies)

- Go to **Configuration → Payment Methods**.
- Scroll to the section **Payment Gateway (DRC)**.
- Choose your **Provider** (PawaPay, CinetPay, or Flutterwave).
- Set **Environment** to **Sandbox** for now.
- Paste the **secret codes** from your chosen company (see Step 2 for where to find them).
- Turn **Online payments ON** and tick the Mobile Money options you want (Orange, Airtel, etc.).
- Click **Save**.

There is also a box on this page showing **Webhook URLs**. A "webhook" is simply the **return message** the payment company sends back to tell Digitex a payment succeeded. You will copy these URLs into the payment company's website in Step 2 — that's what makes invoices update automatically.

Your webhook URLs (replace `YOUR-DOMAIN.com` with your real website address, e.g. `e-digitex.com`):

```
https://YOUR-DOMAIN.com/webhooks/payments/pawapay
https://YOUR-DOMAIN.com/webhooks/payments/cinetpay
https://YOUR-DOMAIN.com/webhooks/payments/flutterwave
```

> **In short:** Digitex needs the company's secret codes, and the company needs Digitex's webhook URL. You are just introducing them to each other.

Step 2 — Get your codes from the payment company

Pick the section for the company you chose.

Option A — PawaPay (recommended)

- Create a free account at **<https://dashboard.pawapay.io>** (for live) or **<https://dashboard.sandbox.pawapay.io>** (for testing).
- Fill in your school details (name, contact, bank info) so they can approve you.
- In their menu, open **Settings → API** and **copy the API Token** (a long secret code). Keep it private — never share it.
- Back in Digitex (Payment Methods), paste it into **PawaPay API Token** and Save.
- In PawaPay, open **Webhooks**, click **Add**, and paste your PawaPay webhook URL from Digitex. Choose the events **Deposit completed** and **Deposit failed**.

That's it. PawaPay automatically knows which network to use (Orange, Airtel, or M-Pesa) based on the parent's phone number.

Their help docs: <https://docs.pawapay.io>

Option B — CinetPay

- Create an account at **<https://cinetpay.com>** and verify it.

- Find the integration settings and **copy two codes: the Site ID and the API Key**.
- In Digitex, paste them into **CinetPay Site ID** and **CinetPay API Key**, then Save.
- In CinetPay, go to **Notifications / Webhook** and paste your CinetPay webhook URL from Digitex.

Their help docs: <https://docs.cinetpay.com>

Option C — Flutterwave

- Create an account at **<https://dashboard.flutterwave.com>** and verify your business.
- **Copy the Public Key and the Secret Key** (and Encryption Key if shown).
- In Digitex, paste the **Secret Key** and **Public Key**, then Save.
- In Flutterwave, go to **Settings → Webhooks**, add your Flutterwave webhook URL from Digitex, and turn on the **payment success** event (often called `charge.completed`).

Their help docs: <https://developer.flutterwave.com/docs>

Step 3 — Test it, then go live

- Create a **small test invoice** (e.g. 100 CDF).
- Open its pay link and choose **Pay instantly**.
- Complete the payment using the company's **test instructions** (Sandbox mode).
- Check that the invoice turns to **Paid** by itself within a few seconds.
- When the test works: return to **Payment Methods**, change **Environment** to **Production**, paste your **live** secret codes, and update the webhook URL on the company's live dashboard.
- Do one final test with a **small real payment**.

You're done — parents can now pay from their phones.

If something goes wrong

What you see	What to do
--------------	------------

Parent paid, but invoice still shows unpaid	The webhook URL is missing or wrong. Re-copy it from Digitex into the company's dashboard. Your website must use https:// and be reachable online.
"Invalid API key" or login errors	The secret code is wrong or expired. Generate a fresh one on the company's website and paste it again in Payment Methods.
Payment is rejected on the phone	The parent's phone number must match their Mobile Money network and start with the DRC code (243...).
The payment company is temporarily down	Parents can still pay using the Upload proof tab instead (see Module H10).
Worked in testing but fails live	You forgot to switch Environment to Production or are still using the test secret codes. Use the live codes.

Need more help?

Simple, picture-by-picture guides (no login needed) are online at: **<https://e-digitex.com/help>**

Module H10: Manual Payment Proof (Upload & Review)

Purpose

When parents pay **offline** (Mobile Money agent, bank deposit, cash at office without immediate recording), they can **upload proof** on the pay page. Accountants **approve or reject** submissions before the invoice is marked paid.

H10A: Parent — Upload proof

- Parent opens invoice pay link (/pay/...) or finds invoice at /pay .
- Select tab **Upload proof**.
- Fill in:
 - **Payment date and time**
 - **Transaction / reference ID**

- **Payment method** (Orange, Airtel, bank, etc.)
- **Amount paid**
- **Receipt photo** (screenshot or photo of slip)
- Submit → status **Pending review**.

Tip: Encourage parents to include the full transaction SMS or agent receipt for faster approval.

H10B: Accountant — Review proofs

Menu: Finance → Fees & Collection → **Payment Proofs**

Action	Result
Approve	Payment recorded; invoice balance updated; parent notified
Reject	Parent can re-submit with correct information

Step-by-step — Approve

- Open **Payment Proofs**.
- Review pending list — click submission to see receipt image and details.
- Verify amount and transaction ID match bank/Mobile Money statement.
- Click **Approve** → invoice marked paid (or partial payment applied).
- If invalid duplicate or wrong amount → **Reject** with reason.

Example

- Parent pays 150,000 CDF at Orange agent — TRX: OM-20250914-8821 .
- Uploads proof on pay page with receipt photo.
- Accountant sees pending proof next morning.
- Matches statement → **Approve** → INV-2025-0089 **Paid**.

Depends on

Manual proof upload enabled in Payment Methods; `storage:link` run on server for receipt file uploads.

Help Center & Community Forum

Public Documentation (no login)

Page	URL	Content
Documentation home	<code>/help</code>	Search, links to full manuals, quick guides, forum
Web user manual	<code>/manual/web</code>	Complete browser admin guide — all modules A–M

Quick guides	<code>/help/payment-gateway-overview</code> (etc.)	Focused setup articles
Community forum	<code>/community</code>	Ask questions (post requires login)
Pay fees	<code>/pay</code>	Public invoice payment

Live example: <https://e-digitex.com/help>

PART I — COMMUNICATION

Module I1: Notices (Announcements)

Purpose

Official messages on notice board — holidays, meetings, exam rules.

Example

- **Title:** Parent-Teacher Meeting — October 20
 - **Audience:** Parents only
 - **Published:** Yes → all parents see in **My Notices** + bell alert
-

Module I2: Reminders (Fee & Exam SMS)

Purpose

Manually trigger bulk **fee reminder** or **exam tomorrow** SMS/WhatsApp to selected classes.

Depends on

SMS/WhatsApp configured, templates, credits.

Example

Send fee reminder to **Grade 5** parents: *"Outstanding balance for Marie Kouassi: 150,000 XOF. Please pay by Dec 15."*

Module I3: Chatbot (WhatsApp / SMS)

Purpose

Parents text school WhatsApp number, get menu: fees, homework, results, pickup QR — without opening app.

Depends on

WhatsApp provider, keywords configured in **Chatbot Settings**, SMS credits.

Example conversation

Parent: **GVIS** (school keyword)

Bot: *Welcome to Green Valley. Reply 1 for fees, 2 for homework...*

Parent: **1**

Bot: *Marie Kouassi balance: 0 XOF. All clear!*

Configure keywords under **Chatbot → Settings**.

PART J — PICKUP (Child Collection Security)

Module J1: Student Pickup — Full Flow

Purpose

Ensure only authorized persons collect children — QR scan at gate, teacher approval.

Who uses it

Parents (generate QR), Guards (scan), Teachers (approve).

Depends on

Students, Enrollments, optional SMS on approval.

Step-by-step (example)

- **08:00** — Mother opens mobile app → **Gate Pass** for Marie → QR code `PKUP-8X7K2M`
- **14:45** — Guard at gate scans QR → status **Scanned**
- Teacher Mr. Dupont sees pending pickup on **Pickup Management** page
- **14:50** — Teacher clicks **Approve**
- Mother receives: `"Marie released safely at 14:50"`

Common questions

Q: Parent lost phone — no QR?

A: Use **OTP pickup** (staff generates SMS code) via mobile app or office.

PART K — ELECTIONS & VOTING

Module K1: Elections

Purpose

Student council elections — positions, candidates, voting, results.

Flow

- Admin creates **Student Council Election 2025**
- Adds positions: President, Vice President
- Registers candidates
- **Publish** election → students vote at **My Elections**
- Close → publish results

Example

Marie votes for candidate **Yao Christian** as President — one vote per student enforced.

PART L — QUICK REFERENCE — MODULE

DEPENDENCY CHART

Module L1: Module Dependency Chart

Purpose

See **what must be created first** before using each area of the system. If something is missing from a menu, work through this chart from top to bottom.

Who uses it

School Admin, Head Officer, Super Admin — especially during **initial school setup**.

Setup order (recommended)

Step	Create first	Then you can use
1	Institution (school)	Everything else
2	Campus (optional)	Multi-site reports
3	Academic Session (mark one as *current*)	Enrollments, fees, exams
4	Configuration (SMS, email, WhatsApp)	Notifications, reminders
5	Grade Levels	Class sections, fee structures
6	Class Sections	Enrollments, attendance, timetables
7	Subjects	Class subjects, exam marks
8	Parents / Guardians	Link to students
9	Students	Enrollments, invoices, attendance
10	Fee Types → Fee Structures	Invoices, payments
11	Staff	Timetables, payroll, gate pickup

12	Exams → Schedules → Marks	Result cards, reports
----	----------------------------------	-----------------------

Visual dependency chart

Example story

Green Valley opens in September. The admin creates **Session 2025-2026**, then **Grade 5**, then **Grade 5 Section A**, then imports **students**, then **enrolls** them — only then **Bulk Generate Invoices** works.

Common questions

Q: Invoices menu is empty / generate fails.

A: Check fee structures exist for the student's grade and session, and the student is **enrolled** in a class.

Q: Teacher cannot mark attendance.

A: Student must be **enrolled** in that class; teacher must be assigned to class/subject.

Q: Parent cannot pay online.

A: Invoice must exist; **Payment Methods** → Online payments must be ON; gateway configured (Module H9).

PART L — DIGITEX AI (OPTIONAL ADD-ON)

Module L1: AI Access and Where to Find It

Purpose

Digitex AI helps staff draft notices, reminders, report comments, support replies, and quick summaries — **inside the module you are already using**, without copying data to an external chatbot.

AI is an **optional add-on** on your subscription plan (Basic / Premium / PRO / Enterprise). If your plan includes AI, you will see:

- **Sidebar: AI Assistant** (full chat) and **AI Studio** (writing tools)
- **Bottom-left purple button:** Quick help about the **current page**
- **Purple “AI” buttons** on notices, reminders, results, invoices, students, marks, support, and the dashboard

If you do **not** see these, your school plan may not include AI — contact your administrator or Digitex support to upgrade.

Who uses it

School Admin, Teachers, Accountants, Head Officers (when plan includes AI). Students and parents typically do **not** use staff AI tools.

Depends on

- Your **subscription package** has **AI enabled**
- Platform administrator configured an **AI provider key** (OpenAI or compatible API)
- You are **logged in** with a role that can open the module (e.g. you need notice permissions to draft notices)

Step-by-step — Open the AI Assistant

- Log in at **<https://e-digitex.com/>**

- In the left sidebar, open **Digitex AI → AI Assistant**
- Type a question, e.g. ***“How do I bulk generate invoices for Grade 5?”***
- Click **New chat** anytime to start a fresh conversation

Step-by-step — Use the floating widget (any page)

- Look at the **bottom-left corner** for the purple **magic wand** button
- Click it to open a small chat panel
- Ask about **this screen**, e.g. on the Invoices page: ***“What does overdue mean?”***
- Click the external-link icon to open the full **AI Assistant**

Common questions

Q: AI says “not included in your plan”.

A: Your package needs **AI enabled**. Super Admin can check **Finance → Packages** or **Plan** page for upgrade.

Q: AI gives generic answers.

A: Use the **module AI buttons** (they send real context like exam marks or invoice totals). For school-specific rules, confirm with your admin.

Module L2: AI on the Dashboard (School Copilot)

Purpose

On the **Dashboard** home page, the **School copilot** card summarizes what needs attention today — overdue fees, draft notices, upcoming exams — using live school data.

Who uses it

School Admin, Head Officer, Accountant, Teacher (items shown depend on your permissions).

Step-by-step

- Go to **Dashboard**

- At the top, find the **School copilot** card
- Click **What needs attention?**
- Read the bullet list and act (open Invoices, Notices, etc.)

Example story

Monday morning, the bursar opens the dashboard, clicks **What needs attention?**, and sees *‘‘12 overdue invoices’’* and *‘‘2 unpublished notices’’* — she opens Finance and Notices first.

Module L3: AI in Notices

Purpose

Draft and translate notice text before publishing to staff, students, or parents.

Who uses it

School Admin, staff with **notice create/edit** permission.

Step-by-step — Draft a notice with AI

- Go to **Communication → Notices → Create**
- Fill **Title**, **Type**, and **Audience**
- Optionally type a short topic in the **AI topic** box (or leave blank to use the title)
- Click **AI draft** — review the text in the confirmation popup
- Click **Apply** to paste into **Content**
- Click **AI translate** to translate existing content (e.g. English ↔ French)
- Tick **Publish immediately** or save as draft
- Click **Save**

Example story

The head teacher needs a urgent rain-day closure notice. She enters title *‘‘School closed — heavy rain’’*, clicks **AI draft**, edits one sentence, and publishes to **All**.

Common questions

Q: Can AI publish without me?

A: No. You always confirm before text is applied, and you click **Save** to publish.

Module L4: AI in Results and Report Cards

Purpose

Generate **report card comments** for every student in a class after an exam, based on their marks.

Who uses it

Teachers and admins with access to **Results** / report cards.

Step-by-step

- Go to **Exams** → **Results** (student result card page)
- Scroll to **Bulk report comments** (AI section)
- Select **Exam** and **Class**
- Click **Generate comments**
- Copy comments into your report card workflow or printing process

Example story

After Term 1 exams, Mr. Dupont selects *Mid-Term 2025* and *Grade 5 A*, generates comments, and pastes each student's comment into the report template.

Module L5: AI in Reminders (Fees and Exams)

Purpose

Draft SMS, WhatsApp, or email reminder text **before** sending fee or exam broadcasts.

Who uses it

School Admin, Accountant (fee reminders); Admin, Teachers (exam reminders).

Step-by-step — Fee reminder with AI preview

- Go to **Communication → Reminders**
- Under **Fee reminders**, choose **Class** (optional), **Fee tranche**, and **Channel**
- Click **AI draft message** — text appears in **Message preview**
- Edit the preview if needed (placeholders like [Student Name] stay for the system)
- Click **Send fee reminders**
- Confirm in the popup — the preview is shown again before dispatch

Step-by-step — Exam reminder

Same flow on the **Exam reminders** card: set class and channel, **AI draft message**, edit, then **Trigger exam reminders** and confirm.

Example story

The accountant drafts a polite French SMS for overdue tranche 2, tweaks the amount wording, then sends to **Grade 5 A** only.

Module L6: AI in Finance (Invoices)

Purpose

Explain an invoice in plain language: amount due, status, and suggested follow-up for parents who have not paid.

Who uses it

Accountant, School Admin.

Step-by-step

- Go to **Finance → Invoices** and open an **unpaid**, **partial**, or **overdue** invoice

- At the top, click **Explain with AI**
 - Read the summary and use it when calling parents or writing emails
-

Module L7: AI in Students (360° Summary)

Purpose

One-click summary of a student: class, recent marks, attendance trend, and fee balance — for parent meetings or staff handover.

Who uses it

Teachers, School Admin, counselors.

Step-by-step

- Go to **Students → Student list** → open a student profile
 - Click **AI 360° summary** at the top
 - Read the bullet summary (generated from that student's records)
-

Module L8: AI in Exam Marks (At-Risk Analysis)

Purpose

After entering marks, identify students who may need extra support (low averages) with suggested interventions.

Who uses it

Teachers, School Admin.

Step-by-step

- Go to **Exams → Enter marks**
- Select **Exam** and **Class section** (same as for mark entry)
- In the **At-risk analysis** card, click **AI at-risk scan**

- Review the list and plan remedial sessions
-

Module L9: AI in Support Tickets

Purpose

Draft a professional reply to a support conversation (school ↔ Digitex support).

Who uses it

Anyone who can reply on a support ticket thread.

Step-by-step

- Go to **Support** → **My tickets** (or Super Admin inbox)
 - Open a ticket
 - Click **AI suggest reply**
 - Edit the text in the message box and send as usual
-

Module L10: AI Studio (Standalone Writing Tools)

Purpose

General-purpose tools when you are **not** on a specific module page: draft notices, translate, summarize, improve writing, report comments, support replies.

Step-by-step

- Sidebar → **Digitex AI** → **AI Studio**
 - Pick a tool card (e.g. **Translate**)
 - Paste your text, choose tone or language
 - Click **Generate** and **Copy**
-

Module L11: AI Settings (Super Admin)

Purpose

Configure the platform AI API key, model, and monitor usage across schools.

Who uses it

Super Admin only.

Step-by-step

- Sidebar → **Digitex AI** → **AI Settings**
 - Enter API key and model (or leave default)
 - Save
 - Enable AI per package under **Finance** → **Packages** (tick **AI enabled**, set monthly limit or unlimited)
-

PART M — GLOSSARY FOR NON-TECHNICAL USERS

Module M1: Glossary for Non-Technical Users

Purpose

Plain-language definitions of words you will see in Digitex SMS menus, reports, and mobile app.

Who uses it

Everyone — especially new secretaries, accountants, teachers, and parents.

Term	Simple meaning
Institution	Your school in the system
Session	School year (e.g. 2025-2026)
Enrollment	Student placed in a class for a year
Tranche	Fee installment (1st payment, 2nd payment...)
Invoice	Bill for fees owed
Payment proof	Photo/receipt parent uploads after paying offline
Payment gateway	Online service (PawaPay, CinetPay, Flutterwave) that collects Mobile Money
Webhook	Automatic message from gateway to your server when payment succeeds
RFID / NFC	Electronic ID card for gate scanning
Gate pass / Pickup QR	QR code for authorizing child collection
OTP	One-time SMS code for verification

Module	A feature area (menu section)
Permission	Allow or deny one action for a role
Role	Job type: Teacher, Accountant, School Admin, etc.
In-app notification	Alert inside the bell icon (not SMS)
Head Officer	Manages multiple schools on the platform
Super Admin	Platform operator (Digitex)
LMD	University credit system (Licence-Master-Doctorat)
Deliberation	University exam board decision on pass/fail
Merchant code	Number parents dial for Mobile Money payments
Sandbox	Test mode — no real money
Production	Live mode — real payments
Digitex AI	In-app assistant and writing tools (optional plan add-on)
AI Assistant	Full chat for how-to questions and drafting
AI Studio	Standalone writing tools (translate, summarize, etc.)
School copilot	Dashboard AI briefing of urgent items
AI embed	Purple AI button on a module page (uses that page's data)

Common questions

Q: What is the difference between invoice and payment?

A: **Invoice** = bill (money owed). **Payment** = money received against that bill.

Q: What is a payment token / pay link?

A: A secret URL on an invoice that lets parents pay without logging in.

End of User Manual — For technical setup and API details, see Developer Manual and REST API Manual.
